

Dear Dr. Jezer,

Thank you for providing me one of the most important and memorable experiences of my life. It was a pleasure to meet you and to be a part of your prestigious Symposium on Energy in the 21st Century. It was an honor to be your guest and to receive the prestigious Energy 21 Award at NYCSEF.

It was truly amazing to have the opportunity to meet you and other important leaders in the renewable energy field. All of the presenters gave me a more comprehensive understanding of the issues facing the future of renewable energy.

As a freshman at Regis High School in New York City, I am eager to learn more about how I can help serve others through my initiative and leadership. I recently applied for the EPA President's Environmental Youth Award and am hopefully if chosen to have additional opportunities to fight climate change and educate others about the need to conserve the natural resources of our planet.

I hope to stay in touch with you so that I may be able to participate again next year and to continue to network with others. Should you become aware of any opportunities that I might be able to assist you with please do not hesitate to reach out to me! I am looking for opportunities to be more involved and to find a scientist as a mentor for my next project. I have reached out to Mr. Logan and to Mr. Bruckner as well for potential internships and opportunities.

Thank you again for including me in your important endeavors. It is an experience that I will always be thankful for. I hope to see you again soon! I have attached my resume in case you would like to have more information about me and my recent accomplishments.

Sincerely,

Austin Crouchley
