KEYNOTE SPEAKER

JUDY MURPHY, DN(hon), RN, FACMI, LFHIMSS, FAAN

Nurse Executive & Health IT Leader | Minneapolis, Minn.

TOPIC: Health IT Strategy and Culture in the Era of AI

A pioneer and thought leader in national and international health and nursing informatics, Murphy was Chief Nursing Officer for IBM Global Healthcare and Deputy National Coordinator for Programs and Policy in the Office of the National Coordinator for Health IT (ONC) in the U.S. Department of Health and Human Services. With over 100 articles and book chapters to her name, Murphy has done countless national and international presentations.

CONFERENCE FOCAL POINTS

1. Explore emerging AI innovations in healthcare
    - AI technologies transforming healthcare delivery and outcomes
2. Engage with practical applications of AI in healthcare settings
    - Implementation strategies, challenges and solutions
3. Advance AI education for healthcare stakeholders
    - Strategies to integrate AI concepts into curricula and professional training for healthcare educators, practitioners and students.
4. Address ethical and policy implications of AI
    - Ethical considerations, equity challenges and policy frameworks guiding responsible use of AI in healthcare.
5. Promote interprofessional collaboration and leadership
    - Partnerships to enhance AI integration across the healthcare continuum
