

Firefly Integrations Training Academy

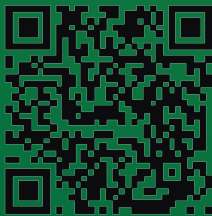

Firefly Integrations will be hosting a series of regional training events across North America. Designed to increase technician knowledge on troubleshooting and repairing the Firefly multiplex system, each 4-hour session will earn participants/attendees credits toward RVTI Level 3 certification.

The hands-on training and technical discussion are designed to familiarize technicians with troubleshooting, diagnosing, and testing Firefly Integrations' operating panels.

With a heightened understanding of RV-C and CAN BUS technology, technicians will be able to efficiently distinguish between operational, technical, and software issues. This small investment will allow technicians to greatly diminish the time spent troubleshooting and diagnosing issues, not only with the Firefly system but with other systems within an RV as well.

There will be multiple sessions at each location over a few days, each four hours long. Morning sessions will be held from 8:00 am- 12:00 pm. Afternoon sessions will be held from 1:00-5:00 pm. Each session will include a fifteen-minute break and light refreshments. Technicians are required to bring a multimeter.

Each session will cost \$125 per person and registration will open 12 weeks before the event. To register for an available training session, please scan the QR code.

Dates

May 7-9: San Bernardino, CA	July 23-25: Orlando, FL	Oct. 2-3: Baton Rouge, LA
May 21-22: San Diego, CA	July 30-31: West Chester, PA	Oct. 16-17: Fredericksburg, VA
May 23-24: Spokane, WA	Aug. 7-8: St Louis, MO	Oct. 22-24: Lewisburg, TN
June 25-26: Portland, OR	Aug. 20-21: Tulsa, OK	Nov. 5-7: Atlanta, GA
June 27-28: Seattle, WA	Aug. 22-23: Springfield, MO	Nov. 19-21: Fort Worth, TX
July 9: Red Deer, AB, Canada	Sept. 10-12: Phoenix, AZ	Dec. 3-5: Las Vegas, NV
July 11: Billings, MT	Sept. 24-26: Houston, TX	Dec. 17-19: Sacramento, CA
