The Future of Work
January 2020

The robot apocalypse

The unleashed workforce

A walk through history...

»» 50
years ago

The government mission attracted and energized many employees. They came to work with a sense of meaning and purpose—serving the public.¹

»» Today

With the latest advances, digital technology can remove many of the manual activities that frustrate government employees, allowing current and future employees to have a clearer line of sight to mission impact and meaning.³

»» 10-20
years ago

Many employees began leaving the government after a few years' tenure, citing frustrations with bureaucracy, inefficiency, and disconnectedness from the mission.²

The Future of Work...

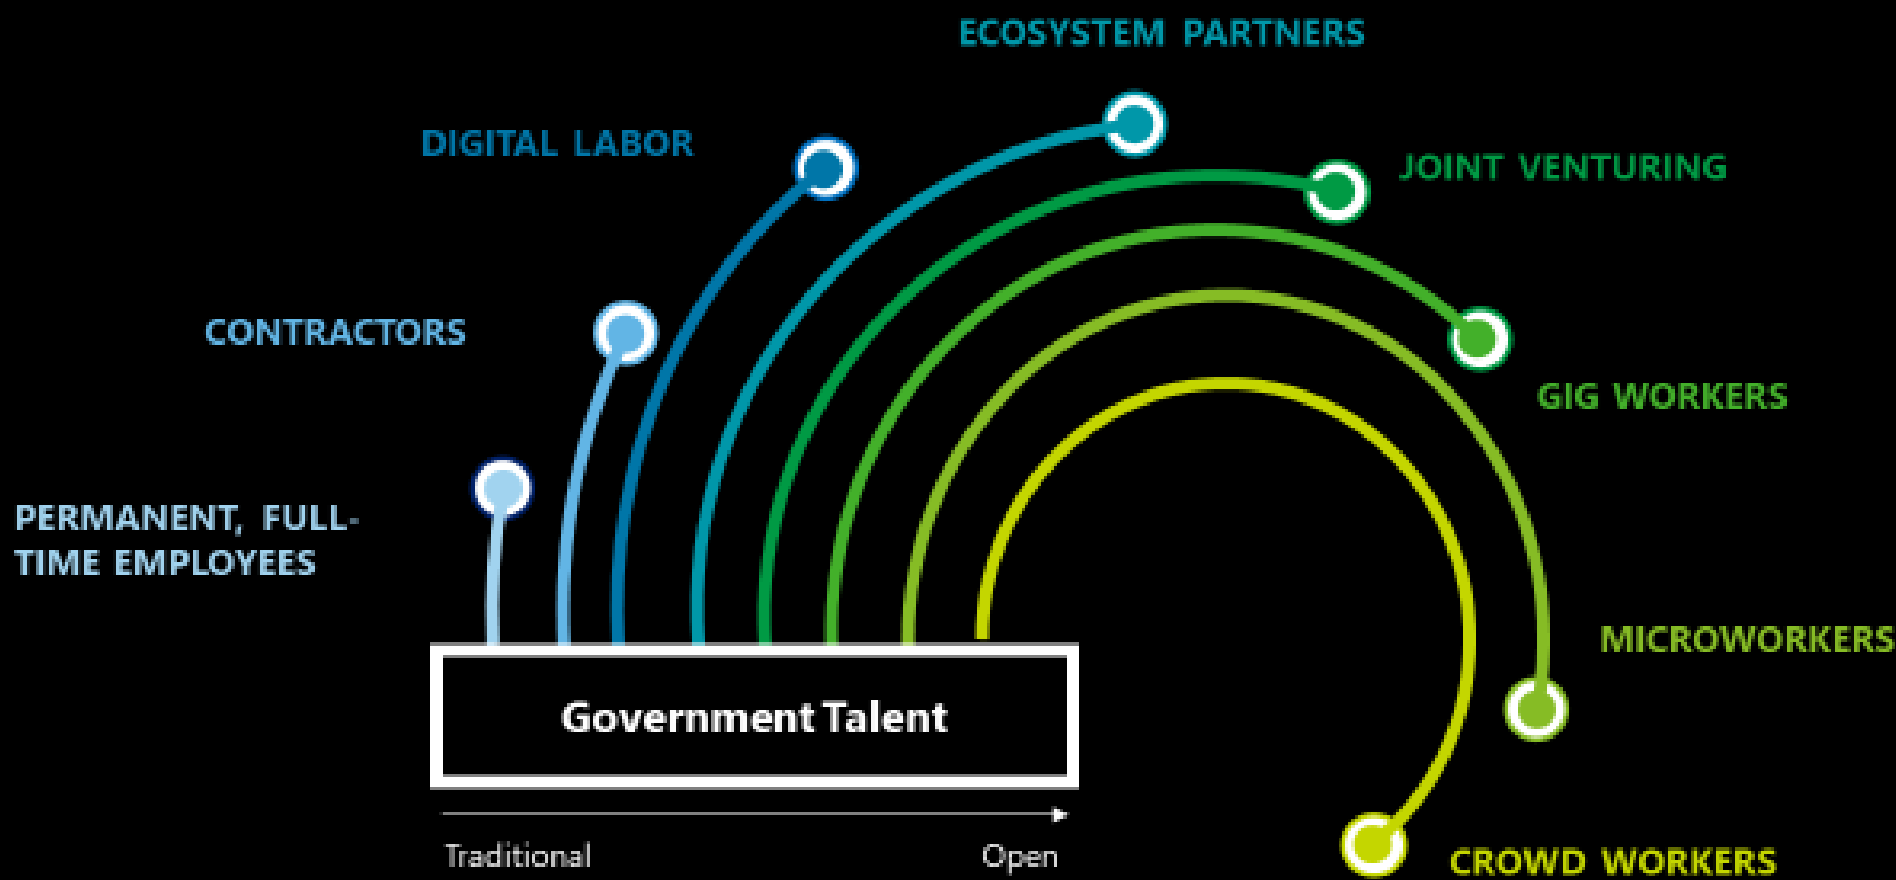

...is an opportunity to reimagine all dimensions of work.

WORK | The human-machine pairing

 **WORKFORCE** | Moving to multiple dimensions of skills & talent

In what workplace can the business thrive?

PHYSICAL LAYOUT

- What physical space best supports your business needs and operating model?
- What physical layout enables the culture that you aspire to?
- How does your space allow for collaboration, innovation, productivity, and comfort?

COLLABORATION

- How do you build a workforce and operating model that enables a network of teams?
- What tools and mechanisms are in place to enable collaboration across functions, BUs, locations, etc.?
- How do you break down siloes?

CULTURE

- What is your organization's long-term culture vision?
- What behaviors are in support of your mission and business model, and what behaviors act as barriers?
- How do you maintain your culture as the organization scales or changes?

PROXIMITY

- How important is physical proximity to the work that your organization does?
- What barriers impede employees' ability to work across geographies?
- How do you balance the value of physical proximity with the flexibility many employees desire?

POLICY

- What workplace policies exist, and do they encourage the behaviors and activities the business requires?
- How often are policies revisited and what impact are they having on business value, workplace productivity, and worker engagement?

New Realities

We are seeing a shortage of certain skills, as existing jobs are redefined and new jobs created

Shortages

10,000

or fewer **AI specialists** exist worldwide

250,000

The shortage the US economy will experience of **data scientists** by **2024**

1.8M

The **workforce gap** that **cybersecurity** will experience by 2022

Job Growth

50 million

new **technology jobs** globally by 2030

5 million

Net new **care provider** jobs in the US by 2030

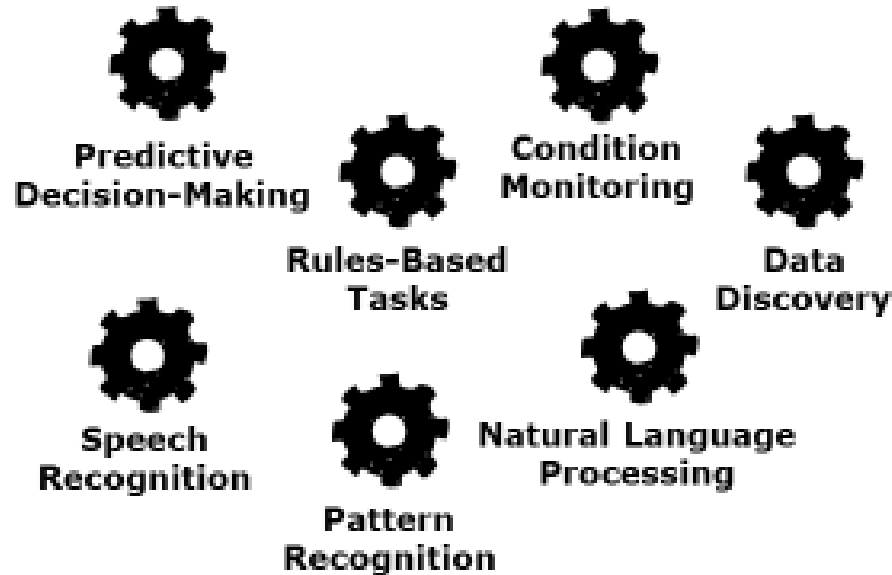

50%

growth expected in **creative roles** in China and India by 2030

In the digital era, humans and machines collaborate to enhance performance

SELECTED MACHINE SKILLS

CRITICAL HUMAN SKILLS

PRODUCTIVITY

- ✓ Perform current duties faster and with less errors
- ✓ Offer new capabilities
- ✓ Enable workforce to focus on more strategic initiatives

CAPACITY FOR INSIGHT

- ✓ Strategize ideas and solutions to improve outcomes
- ✓ Use data to reframe problems and better understand complex issues
- ✓ Explore options and scenarios in real time through interactive dashboards

**ENHANCED
PERFORMANCE**

What tasks are essentially human

HUMANS

- Perception
- Speech clarity
- Near vision
- Fine manual dexterity
- Selective attention
- Problem sensitivity
- Oral and written expression
- Oral and written comprehension
- Inductive and deductive reasoning
- Creativity
- Category flexibility
- Complex problem-solving
- Judgment
- Applying expertise
- Active listening
- Management
- Critical thinking
- Ethics
- Handling ambiguity
- Operations analysis
- Persuasion
- Empathy
- Emotional intelligence
- Social perceptiveness
- Negotiation

ABILITIES:

- Psychomotor, sensory, physical
- Cognitive

SKILLS:

- Content, process, system
- Social

MACHINES

- Coordination
- Precision
- Rate control
- Strength
- Basic speech
- Sound localization
- Speech recognition
- Dynamic flexibility
- Night and peripheral vision
- Reaction time
- Stamina
- Regular object manipulation
- Scalable processing capacity
- Fact recall
- Computation
- Routine reading comprehension
- Equipment operation and repair
- Pattern recognition
- Impartiality
- Logic
- System design
- Novelty detection
- Condition monitoring
- Structured inference
- Data discovery

Enduring and essential human skills

COMMUNICATION

Listen, respond and express ideas effectively in different contexts, influencing others

Service Orientation

Cultural Fluency

Emotional Judgement

COLLABORATION

Effectively work with others, team with others, and lead others

Teamwork

Leading Teams

STRATEGIC

Exercise judgement and leadership to decide the way forward in complex environments

Decision-Making

Professional Ethics

End to End / Big Picture Thinking

PROBLEM SOLVING

Find creative solutions to difficult or complex issues

Design Thinking

Agile Thinking

Innovative Thinking / Creativity

ANALYTICAL

Acquire new knowledge, process information and draw accurate conclusions

Critical Thinking

Data Fluency

Digital Fluency

Technical Fluency

SELF DEVELOPMENT

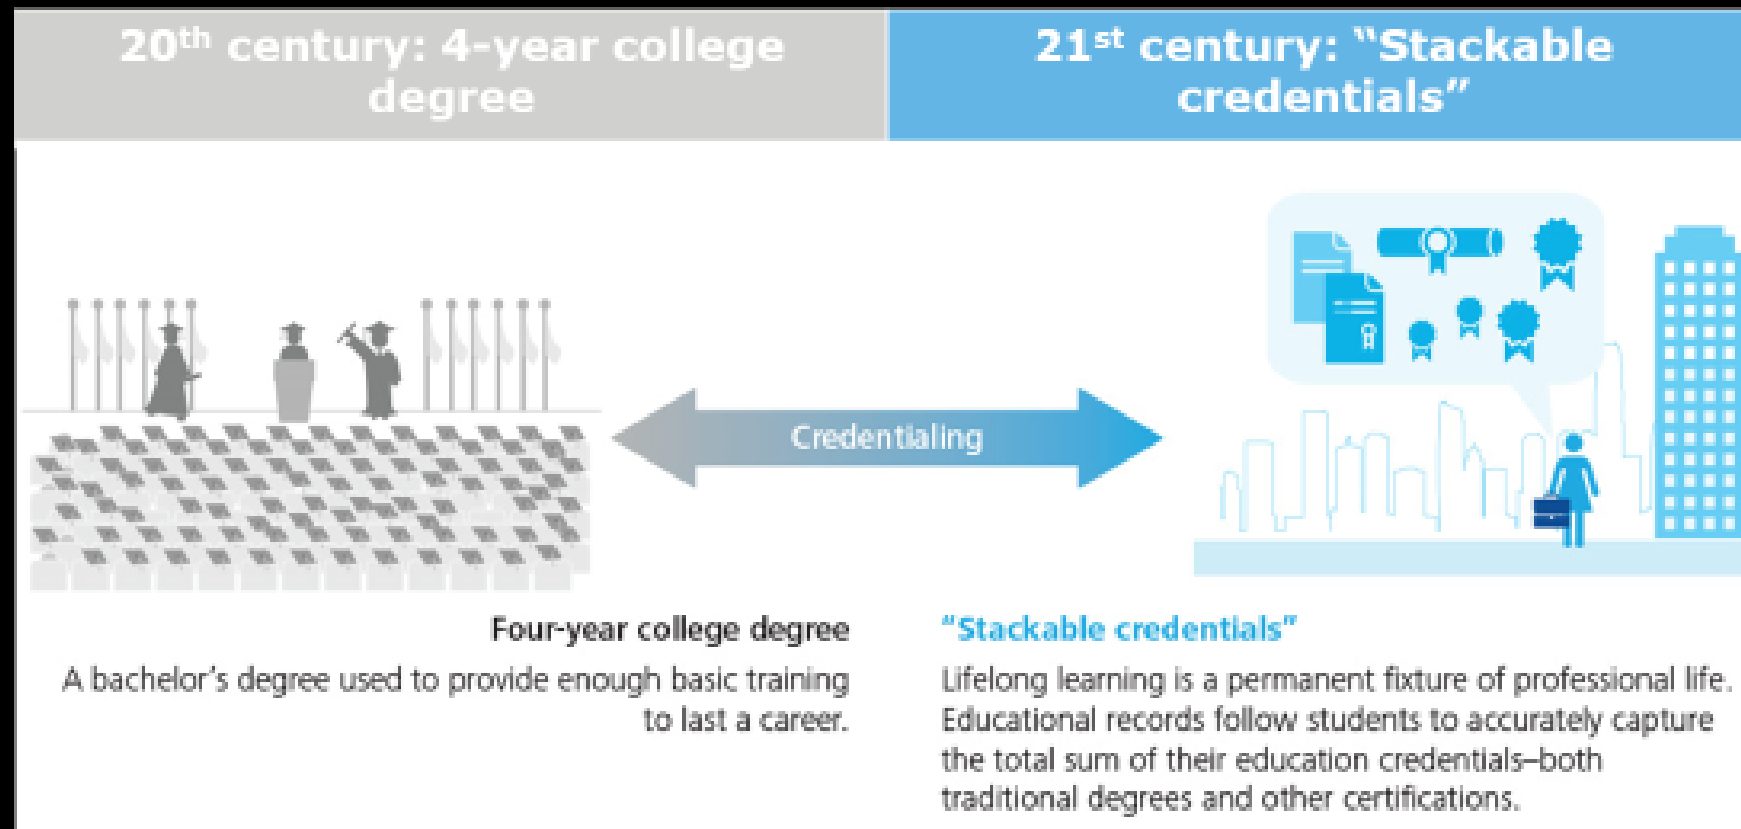

Continuously evolve and upskill oneself

Intellectual Curiosity

Self-Management

Lifelong learning will become a permanent fixture of professional life

“Education is no longer something that happens between the ages of 6 to 22, and then it’s over. The line between the years we learn and the years we earn has blurred; to stay relevant, workers must train nonstop...workers must continue learning throughout their lives to stay relevant. We’re talking less about K-12 education and more about K-Gray education, kindergarten to retirement.” – Dennis Yang, former president and chief operating officer of Udemy

What are the implications Rural America must be considering....

Apprenticeship

Educational Attainment

5G, Big Data, and
Connected City
Infrastructure

Remote Workforce

Competitive Advantage

Rethinking “Technical” Training

Build a work-ready population for employers to tap into

Become a magnet for top talent

Increase educational attainment

Make skills, training, and retraining the focus of workforce development

Flip the customer for workforce programs from job seekers to employers

Address information mismatches in workforce development

Making your jurisdiction a great place to do business

Understand your competitive advantage

Make it easy for businesses to transact with government

Reassess legal and regulatory policies

Reduce and streamline regulatory requirements

Make public data more accessible to business

Today's workers need to approach the workplace much like **athletes preparing for the Olympics**, with *one difference*. They have to prepare like someone who is training for the Olympics but **doesn't know what sport they are going to enter**.

START | STOP | CONTINUE

START

"What should we be doing?"

List items/ideas that:

- The group is not doing, but ought to be doing
- New ideas that have come up, but never acted on
- Ideas that have not been considered
- New ways to address situations

STOP

"What should we stop doing?"

List items/ideas that:

- Are not working for the Council
- Are not providing desired outcomes
- Have proved impractical
- The Council ultimately dislikes

CONTINUE

"What should we continue doing?"

List items/ideas that:

- Are working well and the Council wants to keep doing
- The Council likes and thinks is successful

NEXT STEPS

ADAM SMITH
2020 Vice-Chairman

SAVE THE DATES

2/4/2020: RPC Meeting 1- Albany, GA

3/24/2020: Mini Rural Prosperity Summit (East)- Statesboro, GA
