

How to Fix the Audio during Zoom/Google Meet Meetings on the Student chrome books

Step 1. Click the time in the bottom right corner of the screen to open the menu

Step 2. Click the arrow to the right of the volume bar for more options

Step 3. Under *Input*, drag the Microphone (internal) audio bar back to the left. It should not be past the halfway point. Any more to the right than halfway will cause the “garbled” “wind tunnel” sound while using the microphone during video meetings.
