

VETERINARY TECHNICIAN PINNING CEREMONY

The Veterinary Technician Pinning Ceremony was an honorable night shared amongst fellow students, faculty, family, and friends. With 20 students attending the ceremony, all students present were pinned

for accomplishing the hard work and dedication for the profession and becoming the future for veterinary technicians. Speakers like Mr. Borges shared how this program has grown in the last fifteen years from a couple of students to now with over 300 enrolled in the veterinary technician program. Ms. Haynes shared how she has seen this program every step of the way, since she was the first to start and teach and now heads the program. Mr. McDaniel remarked about his experience being the student mentor, and how he has shared his experiences and wisdom the past few years. Thank you to Ms. Gomez for her organization of the second annual ceremony. And a special thank you to the other professors and veterinarians that teach late at night and take their time to teach others. Awards were handed out to Ms. Julie Haynes, Brittney Thomas, and Jill Airola for their outstanding work in the veterinary technology program and how they have accomplished their success. I was honored to share my experience with a speech I had written and thank the professors my family and also friends for pushing me to finish. This program is my passion and I'm looking forward to achieving my license within the near future.
