

Job Title: Internship

Hours/week: Part-time – Spring; Full-time - Summer

Job Summary: Scouting for pests and disease in conjunction with our Pest Management Team. Coordinating and researching trials in our Greenhouse Division.

Primary Responsibilities:

- Scout Greenhouses for insects and disease twice per week during Spring. Record data on tablet and communicate with supervisors on findings.
- Work with Crop Inputs Supervisor to understand pest pressure and treatment
- Conduct research trials in coordination with staff using soil, water, tissue and inputs. Present findings to company leaders.

Qualifications/Skill Requirements

- Strong organizational skills
- Must be a self starter and have the ability to work independently and efficiently
- California driver's license
- Reliable transportation
- Strong written and verbal skills
- Basic proficiency with computer programs usage such as spreadsheets and reports
- Bilingual (English/Spanish), preferred, but not required
- Agriculture pest management classes preferred, but not required

Working Conditions

- Job function is typically performed in an outdoor environment in seasonal weather conditions; occasional work in an office environment.

Physical Requirements:

- Sit and/or stand for long periods of time
- Lift 40 lbs.
- Frequently walk on unimproved surfaces

Scouting positions will start immediately. Some scouting positions will continue through the summer and possibly into the fall.
