

Ready to Get Back on Your Feet—Online?

A Unique Opportunity for Small Businesses Owners Affected by the Eaton Fire

Story First: Building a Website that Heals and Connects

Join Andrea Napierkowski, from CurlyHost, for a practical, inspiring workshop built for fire-impacted businesses.

You'll create a working online storefront, learn how design builds trust, and discover new ways to reach customers beyond your neighborhood.

Rebuild your presence. Expand your reach. Own your story.

Over the past decade, Andrea has helped hundreds of small businesses craft digital spaces that build trust through authenticity. She will approach this WordPress-based session by blending practical e-commerce setup (product pages, checkout flow, quick-offer setup) with story-driven design (color, tone, and imagery that emotionally connect with buyers).
