

This year Haven of Hope launched a sustainability program, which was designed to help orphanages identify products they can produce. The proceeds from the sale of these products will provide income for the orphanages and enable them to be self-sustaining, and train and teach age-appropriate business classes. A portion of the sales price is then set aside for each student in a savings account, which they will have when they age out of the orphanage and move on to a brighter future.

There are many opportunities to participate in mission trips to the orphanage. For information about upcoming trips click on the following link:

[Haven of Hope International Mission Trip](#)

For those who cannot go on a mission trip to help these children directly, there is still much you can do.

The link below will take you to our Amazon wish list. This list consists of supplies needed to launch the additional products for our sustainability program. Simply make a selection from our wish list and ship to:

Judy Teeven - 9810 Leeward Court, Fort Myers 33919

The two areas we are focused on are Sea Glass and Baking

**Sea Glass:** We are making our own sea glass at the orphanage by upcycling bottles. With this sea glass we are creating jewelry, cards and home décor items.

**Baking:** Many of our girls have been baking cakes and our new program will supply them with supplies and educational tools to turn their craft into a sustainable program.

Follow this link to our Amazon wish list. Thank you for your support.
