# Black Women and PrEP

**In the U.S. both women and Black Americans have an unmet need for PrEP.**

Because HIV disproportionately impacts gay and bisexual men, women are often underrepresented in HIV prevention and treatment efforts, despite representing 23% of all people living with HIV in 2022. Women are also less likely to perceive themselves as at risk for HIV.

## Black People and PrEP

In 2022, **Black people** represented **39% of all new HIV diagnoses**, but only accounted for **14% of PrEP users in 2023**.
