

Dear Parents and Guardians:

Fairfax County Public Schools (FCPS) is considering a boundary adjustment to provide capacity relief to McLean High School. Currently, McLean HS has more than 2,350 students in a building with design capacity of 1,993 students. Enrollment at McLean HS is projected to increase in the next five years.

Langley High School, which is close in proximity to McLean HS, recently completed a renovation that increased its design capacity to 2,370 students. Current enrollment at Langley is 1,972. Enrollment at Langley HS is projected to remain the same or decrease in the next five years. FCPS is not planning to recommend moving students out of Langley HS as part of this boundary adjustment.

FCPS is considering recommending that the School Board approve a boundary adjustment to move some McLean High School students to Langley High School. Some students who currently attend McLean HS could be reassigned from McLean HS to Langley HS, if the boundary adjustment is approved.

Two community meetings are scheduled in December. No decisions will be made at these meetings. The purpose of the meetings is to provide information to the community and receive community input via small group work.

Boundary Adjustment Process

The process for a standard boundary adjustment is outlined in [FCPS Regulation 8130.9](#).

- **Boundary scope** meetings are the first step in the process. During the scope, consideration is given as to areas should be considered in a boundary adjustment.
- **Boundary study** meetings are the second step in the process. During the study, possible boundary change options are offered for consideration.

After the community has had boundary scope and boundary study meetings, the School Board is informed of the boundary change options, holds a public hearing, and then votes at a School Board meeting.

Parents and guardians are invited to attend a **boundary scope meeting** to learn about the process, background information, possible scenarios, and work in small groups to provide feedback to staff about what schools should be considered in the boundary study. Two scope meetings are scheduled. The same information will be presented to the community at both meetings. Please join us at the meeting that works best for your calendar.

- **Monday, December 2** from 7:00 to 8:30 p.m. at Langley HS, [6520 Georgetown Pike, McLean, VA](#)
- **Wednesday, December 4** from 7:00 to 8:30 p.m. McLean HS, [1633 Davidson Rd., McLean, VA](#)

Both meetings will be held in the cafeterias.

Community Meetings Format

FCPS staff will present information and scenarios for consideration on how to reduce McLean HS enrollment by moving some students to Langley HS. After the presentation, community members will work in small groups to discuss the information and provide feedback. If community members have questions, the appropriate staff person will address their question at the table.

The community feedback from the boundary scope meetings will be collected and used to develop options. The options will be presented to the community at **boundary study meetings in the Spring**. Additional feedback will be collected at the boundary study meetings and used to provide a recommendation to the School Board. The School Board will hold a public hearing on the proposed boundary adjustment prior to voting at a School Board meeting.

We look forward to seeing you soon and gaining your input.

Sincerely,

Fabio E. Zuluaga, Ed.D
Assistant Superintendent, Region 2

Douglas A. Tyson
Assistant Superintendent, Region 1
