## PANDEMIC DEVASTED FIRST QUARTER RETAIL EARNINGS WHICH WERE WORST ON RECORD PLUNGING 57.5\% YOY \& DOWN 71\% EXCLUDING WALMART

## FIRST QUARTER RETAIL EARNINGS WRAP

We began tracking retail earnings in the late 90 's and have never seen anything like the devastation wrought by Covid-19. Deep recessions and financial crises decimate consumer confidence and spending but they do not translate into thousands of mandated store closures for retailers deemed to be "non-essential." The World Health Organization labeled Covid-19 a global pandemic on March $11^{\text {th }}$ with the U.S. Government declaring a national emergency 2-days later. The Great Retail shutdown ensued immediately after with department stores, specialty \& teen apparel, sporting goods, home furnishings, auto, luxury and entertainment retailers' brick \& mortar operations going completely dark through April into early May.

Thousands of store closures resulted in the worst retail earnings performance on record with Q1 operating income plunging 57.5\% YOY and a staggering 71.1\% YOY when backing out Walmart's disproportionate impact on the index. By contrast, S\&P 500 first quarter earnings fell just 14.9\% YOY (much of the S\&P had a March-ending quarter). S\&P consumer discretionary earnings plummeted $65.5 \%$ as shoppers reigned in all but essential purchases. The previous low water mark for retail earnings came at the height of the Great Recession when earnings dropped $\mathbf{2 6 . 6 \%}$ YOY in 4Q08. The largest quarterly earnings decline in the aftermath of the Dot.com bubble was only $\mathbf{1 1 . 7 \%}$ in the fourth quarter of 2000. Covid-19's negative impact on retail's bottom line has far outstripped that created by the Financial Crisis or the Dot.com bubble.

The gap between Mall (non-essential) versus off-mall (mostly essential) retail earnings growth exploded with mandated store closures. The divergence had been widening over the last several years due to chronic structural traffic declines coupled with prolific mobile shopping growth. Mall-based retailers were closed for half of March and all of April placing tremendous pressure on every aspect of their business. First quarter earnings for in mall chains cratered by a mind boggling $\mathbf{6 2 6 \%}$ while off-mall companies experienced a much less severe $\mathbf{2 6 \%}$ YOY income drop.

Retail Metrics Quarterly \% YOY Earnings Growth 1999-2020

## Pandemic Induced Shutdown Forced Unprecedented Cost Cutting, Furloughs, Balance Sheet Restructuring

In the wake of locally mandated store closures in mid-March, numerous retailers took aggressive actions to cut costs and sure up their balance sheets. Here are some of the extraordinary measures key publicly traded chains were forced to take:

## Retail Earnings

## Petail Metrics

1. Temporarily furloughed thousands of workers
2. Halted rent payments or sought forebearance
3. Reduce management/board compensation temporarily
4. Permanent job cuts
5. Overhead cost reductions
6. Capital expenditures cuts
7. Reduced corporate share buybacks
8. Cut or eliminated dividend payments
9. Permanent store closures
10. Temporary corporate office closures
11. New debt offerings designed to increase financial flexibility and liquidity
12. Restructuring of existing revolving credit facilities
13. Inventory cost reductions through scaled back orders or cancellations
14. Initiated asset sales to improve cash positions
15. Sale \& lease back deals
16. Expanded curbside pickup and contactless delivery options
17. Skipped interest payments
18. Issued management retention bonuses to keep key players from jumping ship
19. Delayed corporate filings with the SEC

In addition to these measures several retailers have issued going concern warnings, received delisting notices, or have filed for chapter 11 bankruptcy protection:

## Retail Earnings

## Retailers With April-ending Quarters Had Greatest Store Closure Exposure and Performed Worst

To date, 61 retailers with April-ending quarters have issued calendar Q1 earnings results with $85 \%$ of them turning in lower YOY earnings growth. This compares to $71 \%$ of the 28 chains with March-ending quarters and $43 \%$ of stores with February-ending calendar first quarters. Intuitively this makes perfect sense given the vast majority of pandemic related temporary store closures did not occur until mid-March.

Four of 7 retailers with February-ending calendar 1st quarters turned in positive YOY operating income gains. Costco, AutoZone, CarMax, and PriceSmart all generated YOY earnings gains while Rite Aid, Bed Bath \& Beyond and WalgreensBootsAlliance each reported calendar Q1 operating income declines. These chains did not experience the wave of temporary store closures that ensued in mid-March and were thus not adversely impacted in their calendar Q1 as their competitors with March and April-ending quarters were. The pandemic's impact on their calendar $\mathbf{Q 2}$ earnings results has been far more devastating. Bed Bath \& Beyond reported a massive 1627\% YOY calendar Q2 earnings decline. CarMax, Rite Aid, WalgreensBootsAlliance, AutoZone, and Costco also reported calendar Q2 YOY earnings declines of 98\%, 71\%, $46 \%, 16 \%$, and $7 \%$, respectively.

## Retail Earnings

Retail Metrices

## Q1 RETAIL EARNINGS BY THE NUMBERS BASED ON RETAIL METRICS INDEX OF 103 CHAINS

## 1Q20 YOY Earnings Growth

1. Retail index earnings plunged 57.5\% YOY- Worst on record
2. Retail index excluding Walmart $\mathbf{- 7 1 . 1 \%}$ YOY - Worst on record
3. Retail index earnings growth including Amazon -50\% YOY
4. Drug stores best performing segment $+5 \%$ YOY earnings increase (none had April-ending quarter)
5. Department stores worst performing segment with incalculable \% decline (see below)
6. Just 3 sub-industry groups (drug, home improvement, office) generated positive Q1 earnings growth
7. Lowest \# of positive earnings growth segments since 1 Q 09 when there were just 2
8. Teen apparel earnings fell $938 \%$ YOY (non-essential/April end qtr)
9. Discounters generated biggest Q1 profit of $\$ 5.679$ billion (essential)
10. Apparel chains produced the largest Q1 loss totaling $\$ 3.223$ billion (non-essential/April end qtr)
11. Department Stores reported a total Q1 loss of $\$ 2.376$ billion (non-essential/April end qtr)
12. Walmart generated largest Q1 profit of $\$ 3.36$ billion (essential)
13. The Gapposted biggest Q1 loss of $\$ 933$ billion (non-essential/April end qtr)
14. BJ's Wholesale Club reported biggest \% YOY operating income gain of $162 \%$ (essential)
15. Chicos' FAS turned in the largest \% YOY Q1 operating income decline of $3200 \%$ (non-essential/April end qtr)
16. $77 \%$ of retail reported YOY earnings declines - worst on record
17. 21\% of retail turned in YOY earnings increases - worst on record
18. CVS Healthcare reported the largest $\$$ YOY earnings gain of $\$ 397$ million (essential/March end qtr)
19. TJX turned in the largest Q1 income drop of $\$ 1.589$ billion or a $226 \%$ decline (non-essential)
20. 52\% of chains reported Q1 losses - previous high had been $31 \%$ in 4Q08 (Great Recession)
21. 72\% of chains with April-ending quarter lost money

## 1020 Earnings Surprise

22. Retailers missed calendar Q1 earnings expectations by a staggering $\mathbf{2 4 . 1 \%}$ on average
23. Previous rcord quarterly negative surprise occurred in $4 Q 00$ at $-3.3 \%$
24. Record low 41\% of retailers beat Q1 earnings expectations - previous low was $48 \%$ in 2Q14 \& 3Q 08
25. Record 56\% miss Q1 earnings estimates - previous low was $41 \%$ in 4Q08
26. Home Furnishings exceeded forecasts by largest margin $+118 \%$
27. Apparel missed expectations by a massive $\$ 2.224$ billion
28. Dillard's missed earnings estimates by widest margin $\$ 5.38$ followed by Burlington Stores by $\$ 3.34$
29. Signet Jewelers reported the largest positive surprise of $\$ 1.23$ on narrower than expected loss

## 1020 YOY Revenue Growth

30. Retail Metrics Earnings Index Q1 \% YOY revenue growth rose 0.4\%
31. Retail Metrics Earnings Index excluding Walmart Q1 \% YOY revenues fell 2.5\%
32. Discounter revenues led all other segments with a $10 \%$ sales increase with home improvement up $9 \%$
33. Apparel revenues plunged $44 \%$ YOY narrowly outpacing footwear sales which fell $42 \%$ YOY
34. 11 of 15 segments posted negative revenues while just 4 segments were negative
35. 11 negative segments almost reached the previous record of 13 negative segments in both 2Q09
36. Specialty apparel retailer Cato largest revenue decline -55.8\%
37. Sportsmen's Warehouse racked up a $42 \%$ sales gain representing the largest gain of any chain

## Retailers Fell Short of Q1 Earnings Expectations by a Stunning 21.9\% on Average

Given how rapidly the Covid-19 pandemic changed the world in March and April, and continues to do so, it was next to impossible for retail industry analysts to project what first quarter earnings were gong to look like. Retail earnings expectations were slashed dramatically starting in mid-March but revisions could not keep pace with the earnings destruction emanating from mandated store closures, rapidly rising unemployment, plummeting consumer confidence and the resulting belt-tightening across both corporate and consumer America.

Retailers missed lowered earnings expectations on average by $\mathbf{2 4 . 1 \%}$ on average, which dwarfed the previous record negative surprise of just $\mathbf{- 3 . 3 \%}$ in 4Q00. Highlighting just how unusual 1Q20 was, retailers almost never miss

## Retail Earnings

## Retail Metrics

expectations as analysts typically revise expectations lower ahead of earnings season and retailers come in and beat lowered estimates. Our Retail Metrics Earnings Index missed forecasts only 7 times in the previous 84 quarters and only once by 3\%. Retailers missed forecasts by a massive $24.1 \%$ margin despite getting positive earnings surprises from auto retailers (CarMax, AutoNation, Group 1), consumer electronics (Best Buy), discounters (Walmart, Target, Costco), drug stores (Walgreens \& CVS), home improvement (Lowe's \& Floor \& Décor) and home furnishings (Bed Bath \& Beyond, Sleep Number).

Retail Metrics Earnings Index Quarterly \% Point Surprise Performance 1999-2020

## Retail Metrics Earnings Index Quarterly \% Point Surprise Performance for Q1 1999-2020

Home furnishings chains produced the largest Q1 positive earnings surprise beating retail industry analysts estimates by $\mathbf{1 1 8 \%}$ on average. Auto retailers and consumer electronics came in $2^{\text {nd }} \& 3^{\text {rd }}$ exceeding expectations by $18 \%$ and $16 \%$, respectively. Specialty apparel retailers were hammered the most by Covid-19 induced store closures as they were deemed non-essential by state \& local governments. The Street was looking for apparel chains to lose $\$ 917$ million as a group. Apparel retail ended up losing a staggering $\$ 3.141$ billion with The Gap alone posting a $\$ 934$ million loss with TJX closely behind with an $\$ 886$ million shortfall. Burlington Stores, Ross Stores, American Eagle Outfitters, Abercrombie \& Fitch, Express, Chico's FAS, and Guess? all reported calendar Q1 losses of $\$ 100$ million or more.

Apparel, department stores, entertainment, footwear, luxury, and teen apparel chains all reported wider than expected losses during Q1, missing expectations as a group. Virtually all retailers in these segments were deemed non-essential and required to shutter most of their operations. Percentage surprise performance figures are incalculable for these 6 segments due to Street analysts expected losses for them.

## Retail Metrics Earnings Index 1 Q20 Sub-industry Group \% Pt. Surprise Performance

** - denotes wider than expected loss for segment with \% surprise incalculable

Retail Metrics Earnings Index 1999-2020 \% of Retailers Beat/Miss Earnings Expectations

Retailers turned in their worst surprise performance on record both in terms of average percentage miss as well as the percentage of chains that turned in negative Q1 earnings surprises. The chart immediately above highlights the devastating impact Covid-19 had on retail earnings performance relative to consensus estimates. In the previous 81 quarters, the percentage of retailers posting negative earnings surprises had never topped $50 \%$ with the highwater mark hitting $42 \%$ during the second quarter of 2014. Likewise, the percentage of chains beating earnings expectations had fallen below $50 \%$ only twice coming in at 48\% in 1Q14 \& 2Q14.

## Retail Earnings

## Global Pandemic Sent Retail Q1 Earnings Off a Cliff Falling Record 57.5\%

Over half of calendar $\mathbf{Q 1}$ reporting retailers lost money in the quarter. Prior to Q1, the largest percentage of chains to bleed red ink in any given quarter was $31 \%$ in $4 Q 08$. A staggering $80 \%$ of retailers reported lower YOY earnings from 1Q19. First quarter earnings plunged a record $57.5 \%$, more than doubling the previous largest decline of $26 \%$ in 4008 . When backing out Walmart, which accounts for roughly $\mathbf{2 6 \%}$ of the index's sales, Q1 earnings declined a massive 71\% YOY. Walmart proved to be a go-to retailer for American shoppers looking for everything from toilet paper to eggs. The nation's biggest retailer generated its first double digit same store sales increase dating back at least to 1997 due to a surge in demand for basic food and cleaning supplies. Walmart was one of a handful of chains to produce earnings growth during the quarter.

Retail Metrics Earnings Index \% YOY Earnings Growth 1020 Estimate Revisions Vs. S\&P500

The drastic downward revision to earnings estimates was unprecedented during Q1. Wall Street retail industry analysts were looking for the 104 retailers in our index to experience a $2.7 \%$ YOY earnings decrease the day the WHO labeled Covid-19 a global pandemic. One-month later street expectations had plunged 2300 basis points to $-25.4 \%$ on April $11^{\text {th }}$. By May $11^{\text {th }}$, retail industry analysts had cut Q1 earnings estimates by an additional 2,700 bp to $-52.4 \%$. The chart immediately below of both first quarter earnings estimate revision over the last 13 years as well as all quarterly estimate revisions over the same period highlight how unique Covid-19's devastating impact has been.

Retail Metrics Earnings Index Quarterly \% YOY Earnings Growth Estimate Revisions 2012-2020

## "Essential" Retail Segments Generated Best Q1 Earnings Results

Retail Metrics tracks 15 retail sub-industry groups of which just 3 managed to generate positive Q1 earnings growth. Office supply due to Office Depot's $\mathbf{6 7 \%}$ YOY gain (March-end quarter) followed by drug stores $\mathbf{+ 5 \%}$ and home improvement $+3 \%$ with auto retailers, all of which had March-ending quarters, coming in flat.

Not surprisingly, department stores, teen and specialty apparel chains reported the largest YOY earnings declines of any groups. Virtually all retailers in these categories are mall-based, were deemed "non-essential" and were shut down for roughly half the first quarter. Department stores generated a massive $\$ 2.37$ billion loss, which was roughly the exact opposite of Home Depot's $\$ 2.24$ billion Q1 profit. Macy's, Dillard's, Kohl's, Nordstrom and bankrupt J.C. Penney all reported massive losses with Hudson's Bay (Saks $5^{\text {th }}$ Avenue) expected to turn in more red ink. Teen apparel retail earning plunged $938 \%$ from a profit of $\$ 53$ million in 1Q19 to a loss of $\$ 447$ million in 1Q20. Specialty apparel retailers reported a significantly smaller 332\% YOY Q1 earnings decline. The group lost a colossal $\$ 3.22$ billion, the most of any segment by a billion dollars. The Gap accounted for $29 \%$ of the total group loss. Personal care, footwear, luxury and entertainment retailers also all reported percentage YOY earnings declines of over $100 \%$.

Quarterly \% of Retailers in Retail Metrics Index Posting Losses 2008-2020

First quarter losses hit a record $\mathbf{5 2 \%}$ of all chains reporting, which easily surpassed the previous high of 31\% during 4Q08. Retail industry analysts are projecting another record number of retailers to post losses in the second quarter with 54\% of chains forecasted to turn in red ink.

LOCKDOWNS \& STORE CLOSURES CRUSHED RETAIL REVENUES - 1020 +0.4\% \& $\mathbf{- 2 . 5 \%}$ ex-Walmart
The $\mathbf{1 0 4}$ retailers in our Retail Metrics Earnings Index managed to eek out a 0.4\% YOY sales increase during the first quarter. This, despite the fact that thousands of stores across the country were forced to close due to Covid-19. While curbside pickup and ecommerce made up for some of the lost sales, they were clearly not enough. First quarter revenue growth of $\mathbf{+ 0 . 4 \%}$ represented the worst quarterly revenue performance since the Great Recession/Financial Crisis when our index racked up 3 consecutive quarterly revenue declines from 4Q08 through 2Q09 of $\mathbf{- 1 . 6 \%}, \mathbf{- 1 . 4 \%}$, and -2.3\%, respectively.

When factoring out Walmart, first quarter revenues look even worse. The nation's largest retailer turned in Q1 sales growth of $\mathbf{8 . 6 \%}$ and same store sales grew an outsized $\mathbf{1 0 . 3 \%}$ YOY. First quarter retail revenues backing out Walmart fell $\mathbf{2 . 5 \%}$ YOY. First quarter retail revenues fell $\mathbf{5 . 1 \%}$ YOY when taking just 4 retailers out of the mix (Walmart, Target, Home Depot \& Lowe's). A record 74\% of retailers posted lower YOY Q1 revenues exceeding

Retail Metrics Retail Sub-Industry Group 1Q20 \% YOY Earnings Growth

## 11 of 15 Retail Sub-industry Groups Reported Negative 1 Q20 Sales Growth

Retail Metrics tracks 15 retail sub-industry groups of which 11 reported first quarter revenue declines with just 4 managing to grow Q1 sales. This represented the largest number of sub-industry groups posting negative sales growth in over a decade dating back to 13 negative segments in 2 Q 09 .

Intuitively it makes sense that specialty apparel would lead the way with the largest sales decline. Virtually the entire group is mall-based that was deemed non-essential and thus shut down. Apparel revenues plunged 44\% YOY that translated into a crippling 938\% drop in earnings. Not one specialty apparel chain reported a Q1 revenue increase. Footwear retailers were also deemed non-essential which translated into a $42 \%$ YOY sales drop while earnings plummeted $226 \%$. All footwear chains turned in lower YOY Q1 revenues. Department stores were also shuttered for half of the quarter with devastating effects to their already struggling businesses. First quarter revenues fell $39 \%$ with teen apparel retailers closely behind at $-38 \%$. Department stores just turned in their $27^{\text {th }}$ consecutive quarterly sale decline dating all the way back to 2Q13. By contrast, specialty apparel had generated positive revenue growth over each of those 27 straight quarters.

## Retail Metrics

## Discounters Topped All Segments with 10\% YOY Q1 Revenue Growth

Essential retailing topped the list of segments generating the strongest Q1 gains. Big box discounters fueled by strong gains at Walmart, Target, Costco, and BJ's led the way with a $10 \%$ YOY sales gain followed closely by home improvement retailers, which posted a $9 \%$ gain. Drug stores were also deemed essential producing a $7 \%$ YOY revenue gain while having either having February or March-ending quarters. Auto retailers all had March-ending quarters that helped them produce a $1 \%$ Q1 sales increase.
