

**State Enrollment Requirements for Health First Colorado
and Children's Health Plan Plus**

The Center for Medicare and Medicaid Studies (CMS) requires all providers who are providing services to Medicaid or CHP+ patients to be enrolled with the State they are operating in, including Colorado. The State of Colorado Medicaid and CHP+ agency enforces this requirement, expects providers to bill in conjunction with how they are enrolled, and to follow their billing requirements. Rocky Mountain Health Plans has given some leeway on some of these more complex billing requirements historically. Beginning in November 2025 providers will begin receiving feedback on their remittance advice for claims that are not compliant with State requirements. Beginning in January 2026, RMHP will begin enforcing these requirements more strictly via denials or claim rejections in order to align with State expectations. This includes ensuring that the billing, rendering and attending provider NPI's that are on claims are enrolled appropriately with the State and are populated accurately on the claim. Please also be sure that the NPI's are associated with a provider type that is eligible to render and bill for the services provided, and with the appropriate bill type according to the State's enrollment requirements. For more information on the State's enrollment requirements please visit [Provider Enrollment | Colorado Department of Health Care Policy & Financing](#). If you have further questions please contact your Provider Relations Team at the appropriate email below. Thank you in advance for enrolling and billing according to the State's requirements.
