PRIME Practices:

Please review the [Quarter 3 2025 PRIME Reinvestment Region Performance](#). As a reminder, the practice and PRIME region must meet the benchmarks for CMS 2 and CMS 137 by Quarter 4 2025 to be eligible for reinvestment. Please reach out to your Clinical Program Manager if you have questions or need assistance.

Upcoming 2025 HEDIS® Project

The MY2025 Healthcare Effectiveness Data and Information Set (HEDIS®) season begins in January 2026, with RMHP conducting data collection through early May.

HEDIS, is the most widely used set of performance measures in the U.S. health care industry. It enables comparison of health plan performance against national and regional benchmarks and addresses a broad range of critical health issues. Health plans are required to report this data to National Committee for Quality Assurance (NCQA) and state and federal programs to drive improvements in care quality and service.

Our team will contact you to discuss medical record retrieval and identify the most convenient option for your office.

We appreciate your cooperation in providing timely access and the requested records, recognizing the important work you do for our Members. Thank you in advance for your support.

Have a wonderful Thanksgiving and see you in December.

If you have any questions or need support, please reach out to your Clinical Program Manager or contact me directly at mary.beckner@uhc.com.
