

Cultural Competency: Effective Strategies for Primary Care Practices working with People with Disabilities

Thank you for joining us for a 3 part series webinar designed to equip you with essential skills for working with individuals with all types of disabilities. These trainings blend soft skills, such as sensitivity and empathy, with hard skills, including legal requirements and best practices.

Our sessions provide a safe space to ask questions and address any issues or concerns you may have encountered while serving this community. With nearly 10% of Coloradans living with a disability and at least 25% of us likely to experience one in our lifetime, these skills are crucial. Additionally, Long Term Services account for over 40% of the budget, making effective engagement with this population essential.

For those who were unable to attend live or if you know anyone who would benefit from these trainings, below are the recordings and slides.

Disability Competency and Sensitivity training (live session was April 17, 2025)
