

### **Scholarships Available:**

AAACE's North Florida Chapter will award scholarships of up to \$500. Awardees will be notified by email. The scholarships will be issued as a payment on the awardee's behalf sent directly to the University / College financial office.

### **Timing:**

For 2021, the scholarship application must be submitted via the Chapter's website by May 3, 2021

<https://www.nflaace.org/>

### **Eligibility:**

Applicants must be currently enrolled in a program related to cost engineering/cost management with a GPA of 3.0 or higher (on a 4.0 Grading scale). These programs include:

Agricultural Engineering  
Architectural Engineering  
Building Construction  
Business Administration  
Chemical Engineering  
Civil Engineering

Industrial Engineering  
Manufacturing Engineering  
Mechanical Engineering  
Mining Engineering  
Electrical Engineering

Applicants in their final undergraduate year must have been accepted to attend a full-time graduate program in the next academic year to qualify for a scholarship.

### **Evaluation Criteria:**

Scholarship recipients are selected on the basis of academic performance (35%), extracurricular activities or employment (35%), and an essay (30%) on the value of study of cost engineering or total cost management. The essay should explain how AAACE's principles could be an important part of your career goals.

AAACE International is dedicated to advancing the study of cost engineering, and project management through the integrative process of total cost management. To promote this objective, AAACE awards academic scholarships to full-time students pursuing a related degree in engineering, construction management, building construction, computer sciences, business, information technology, etc. The cost engineering profession uses the process of total cost management to identify and define those areas of business in which the discipline of cost engineering and cost management principles may be applied to plan and control resources, assets, costs, profitability, and risk. The major elements of the cost engineering discipline include estimating, project controls, planning and scheduling, business sciences, and project management.
