Inc

Framing

Sub-Contractor:

Group Builders

Distributor:

Foundation Building
Materials

Steel Weight:

1,352,578 lbs

CEMCO Outside Sales

Representative:

Akira Usami

CEMCO Inside Sales

Representative:

Candace Martinez

Victoria Place | Honolulu, HI

Victoria Place is one of the premier luxury condo projects coming up in Honolulu, scheduled to be completed at the end of 2024. Victoria Place was named after Victoria Ward, a gracious host that celebrated local culture and was known for her hospitality. Keeping her legacy alive is at the very core of Victoria Place, with expansive gathering spaces and the welcoming Lauhala Pool House.

It is located in Howard Hughes' 60 acre master-planned community, Ward Village. The project is currently under construction and is located on the front row between Waiea and Victoria Ward Park. Victoria Place will feature 350 residences with 15,590 square feet of open space on the ground level and 64,105 square feet of recreation space on the 5th level. Victoria Place has a timeless design identity that is reminiscent of old Hawaii.

Materials used: Slotted Track, Structural and Drywall
