LEAD CERTIFICATION

LEADERSHIP EDUCATION AND DEVELOPMENT

The LEAD Certification is an honorary distinction accredited by the Apartment Association of Kansas City. LEAD provides a complete development curriculum for current and aspiring property managers, leasing and maintenance professionals and supplier partners. LEAD is designed to recognize the development efforts of property management professionals upon completion of a specific track.

Whether you are a current or future NAA designate, the LEAD Program provides a pathway to your success. By attending seminars, achieving a certification and volunteering with the AAKC, you will obtain an honorary distinction in your particular area of expertise recognized by industry leaders.

AAKC is offering the LEAD Manager, LEAD Leasing Professional, LEAD Maintenance Professional and LEAD Supplier Partner. Each certification requires completion of all requirements set by the AAKC Education Committee to receive this distinction. This program can be achieved in one year with one current education calendar with a maximum 2-year completion requirement. AAKC's 2020 Education committee will be putting together the calendar of all luncheons and seminars that will assist you with your LEAD. You must complete one of the NAA certification programs such as NALP, CAM, CAMT, CAPS or CAS in order to receive your LEAD. So, if you are enrolled in a spring class, you can start now working towards LEAD and receive your pin and certificate in 2020.

For more information on this class, fill out a LEAD application and send to Phoebe Burns at pburns@aaac.us. We now have new LEAD cards for you to keep track of your 2020 requirements and will be mailing the new cards out to everyone who would like to work for their LEAD.
