

Dear Friends

One year after the pandemic year, the global economy is on the rebound. While the accelerated growth mode is creating opportunities, it is also becoming a challenge as companies are struggling to catch-up and build the capacity needed to sustain demand peaks. In this newsletter, we share resources and solutions, reflection and celebration and once again, we are honored to feature our interview with an Industry Champion.

In “one-on-One” with Ken Kamlowksy, General Manager of Exor America, we learn how Italian company, leader in HMI technologies is competing with industry giants by investing heavily in R&D to lead in the current trend of automation and data exchange in manufacturing technologies and smart factories also known as Industry 4.0.

“Industry 4.0 is the future, and it’s here!” enjoy a white paper and dynamic video co-written/produced by Yannick Schilly, President & CEO of Altix and Andre Tello, Junior Associate at Altix, explaining the historical trend toward I 4.0, its benefits, challenges and best practices and challenging us to “hop onboard to perfect processes, predict the future, empower the workforce, and increase efficiency and profits”

Whether operating a factory at the 4.0, or 3.0, or even a 2.0 level, Operations Leaders are key to running a manufacturing business that is constantly improving so that it performs efficiently. Often Operations Leaders are consumed by running the day-to-day operations and have limited opportunities to exchange with peers, benchmark other factories and learn best practices. Altix launches the Operations Leaders Circle of Excellence, a 9-month learning and exchange program for Operations Leaders. We have a couple of spots left for the cohort starting in October 2021.

Please read on as we share exciting news about our growing team, highlights of Altix solutions to support your growth opportunities and perhaps challenges, and much more.

Enjoy the read!

Anne Cappel
