Supporting Rural Persons with Dementia and their Care Partners during Transitions

Study Information

What is the purpose of this study?

The purpose of this research study is understand how to reduce hospitalization-associated cognitive and functional decline in rural persons with Dementia.

Who can participate?

Individuals who:

- are age 45 and older
- have Alzheimer's disease or related dementia diagnosis
- reside in small town, micropolitan or rural area by zip code
- have inpatient stay in last 6 months
- return to community after admission
- have a care partner 18 years or older who will also participate

What does participation involve?

A phone/virtual interview lasting about 45-60 minutes. If interested, the research team can contact you by phone to discuss more.

Do I need to participate?

No, your participation is completely voluntary and your decision whether or not to participate will not impact any care you receive.

Why participate?

This study will directly influence development of an intervention to reduce hospitalization-associated cognitive and functional decline during hospital-to-home transitions.

Will I be reimbursed for my time?

Yes, you will receive \$50 to reimburse your time completing the interview.
