FREE Educational Workshop!**
An Ounce of Education is Worth a Pound of Technology;
Securing the Un-securable!

Please join TANGO and their partner Kyber Security for an informative educational workshop on Cyber Security.

Cyber terrorism has become a multi-billion dollar industry, larger than many of the industries upon which our country was built. As such, businesses and individuals need to be vigilant every day to ensure that they are not the next victim of a cyber-attack. One of the greatest risks to your network being breached is through your employees. Employees often run the risk of compromising a password, losing a device with critical information on it, or falling victim to a phishing attack. In addition to technology tools, a comprehensive security program must involve a training program to educate your staff on the dangers of these common human errors.

In this session, we will provide guidance and tips on properly educating your staff to avoid the pitfalls which could cause your organization great harm.

WHEN: Thursday, October 11, 2018
TIME: 8:30 am (Registration) 9:00 -10:30 am (Workshop)
WHERE: Country Club of Farmington
806 Farmington Ave.
Farmington, CT 06032
