NIAGARA®

SABRE®
WITH STEALTH TECHNOLOGY®

Sabre is the market's entry-level point for Niagara's famous Stealth Technology. This vacuum-assist technology makes less water work harder to maximize performance. With flush volume options of 1.1 GPF and 1.28 GPF, the Sabre line can clear up to 1,000g in a single flush, leaving the bowl clean and clog free.

Niagara's Sabre line is available in round and elongated bowls, ADA and standard heights, and all come with Niagara's patented Stealth Technology. This product line flushes up to 1,000g and is WaterSense Certified.
