

LIBERTY®

Niagara's Liberty line is a cost-efficient option that saves money for architects, builders and plumbing specialists who spec new multi-family construction projects. The Liberty line installs quickly, has an extra-large footprint, and uses standard flapper technology that is familiar to plumbers.

Niagara's Liberty products are available in round and elongated bowls, ADA and standard heights, and 10" and 12" rough-in options. At a 1.28 GPF flush volume, the Liberty line can flush 800g and is WaterSense Certified.
