wirevirus

EXISTING WIRES LIMITING YOUR OPTIONS?

- Wirevirus is your simple and effective way to independently control two zones with one wire.

SEAMLESS INTEGRATION

- Simple installation process without the hassle of dealing with the common wire, saving on wire nuts.
- Pre-stripped copper wire allows for efficient and sturdy waterproof connections.
- Easy installation instructional videos available @wirevirus.com, making setup even simpler for you and your crews.

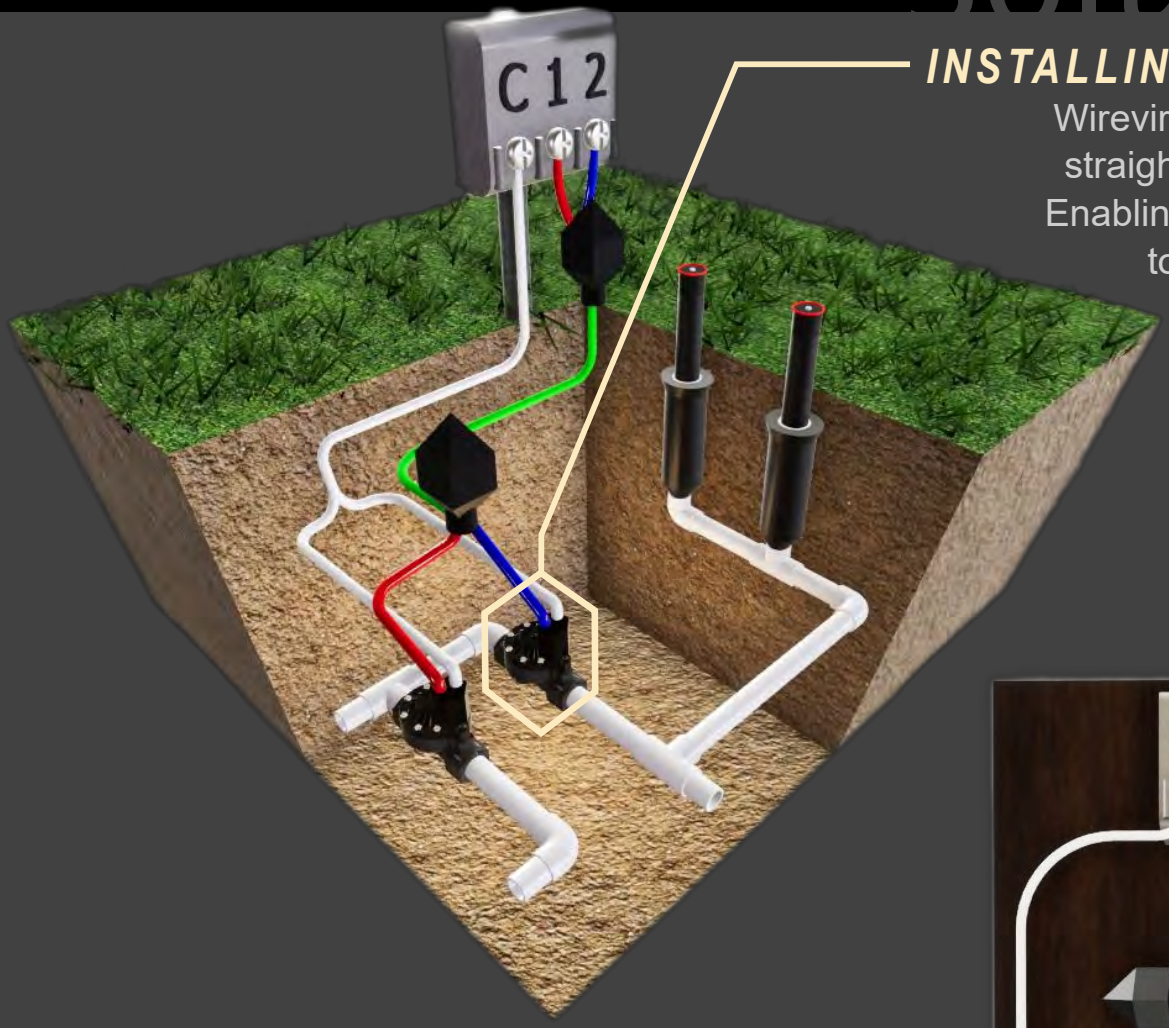

DURABILITY YOU CAN TRUST

- Built with 18 gauge copper wire and tough casing materials, making it well-suited to withstand harsh conditions.

COMPACT, PERFECT FOR ANY SETTING

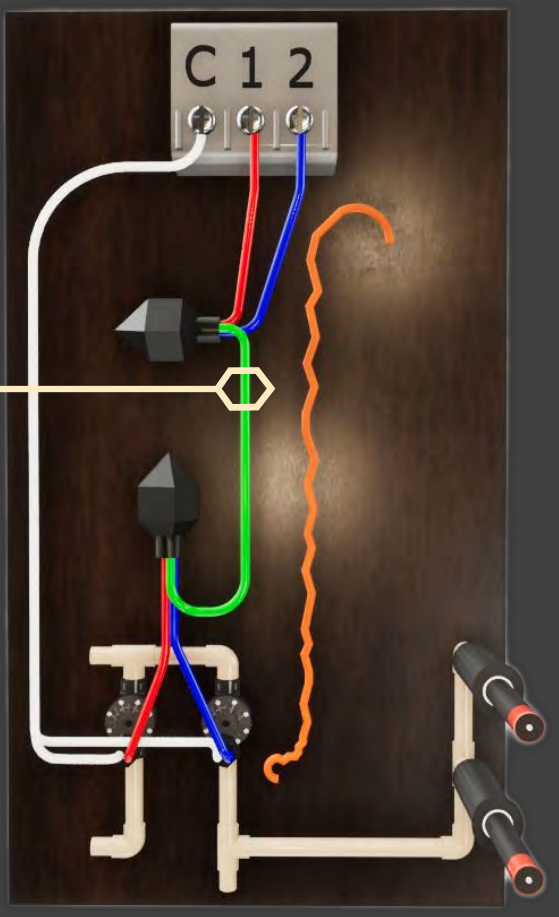

- Fits comfortably in your pocket.
- Doesn't take up much space in your service vehicle.
- Easily fits into controllers providing a streamlined solution for utilizing one wire to control two zones.

Efficient Irrigation Solutions

INSTALLING A NEW VALVE

Wirevirus makes the process straightforward and efficient. Enabling a good FIELD WIRE to manage TWO valves independently or simultaneously.

REESTABLISHING BAD CONNECTIONS

Leave behind those bad wires.
With Wirevirus, you can transform any reliable existing FIELD WIRE to independently or simultaneously operate TWO valves, unlocking new possibilities for your irrigation system.
