

reMAke 4.0 Leadership Commission Established in North Central

On December 6th, The Commission's first order of business included discussion of potential ways to better connect workforce and education to our high school students. This fully engaged discussion resulted in first steps to be accomplished. Some of the immediate strategies being implemented this coming year are:

- Professional development around manufacturing for administration, teachers and school guidance counselors
- Employer workplace tours for students/teachers/parents
- Internships/Co-ops and/or project based learning summer opportunities
- Identifying success stories and marketing the opportunities of manufacturing careers in our region

The Board is currently contacting our workforce partners to engage in the activities listed and we will share our progress and accomplishments on May 14, 2020 at the next reMAke 4.0 North Central Leadership Commission meeting.

Please contact Kelley French at kfrench@masshirenorthcentralwb.com if you are interested in becoming a member of this group or would like more info information about reMAke 4.0 (www.remakema.com) and the reMAke 4.0 North Central Leadership Commission.
