## ALARM LEGISLATION

# It's the Law.

## Comply with State CO & Smoke Alarm Legislation

# HOME SAFETY PRODUCT PLACEMENT GUIDE

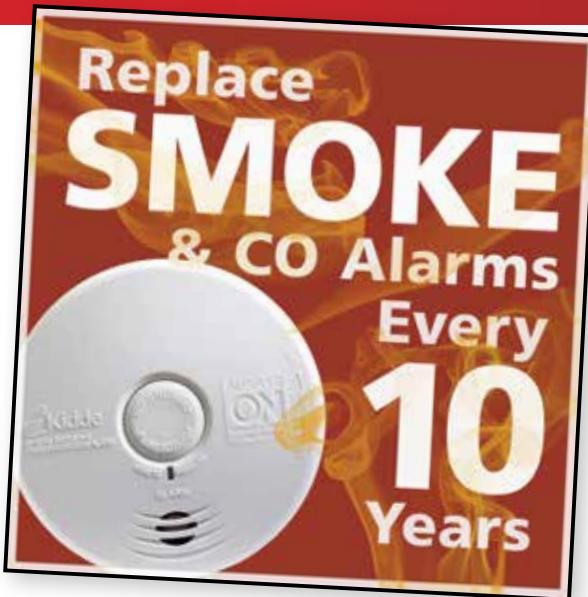

# ALARM PLACEMENT & REPLACEMENT

## DON'T TAKE SAFETY FOR GRANTED

Home safety alarms monitor 24 hours a day & 7 days a week, and are designed to provide accurate readings throughout the life of the alarm.

However, like most appliances, smoke and CO alarms don't last forever and need to be replaced every 10 Years.

## PLACEMENT AND REPLACEMENT RECOMMENDATIONS

State and local codes have changed over the years. Do you have enough alarms to protect your family and home?

PLACEMENT Recommendations		REPLACEMENT Recommendations
<b>Smoke Alarms</b>	Install on every level, and inside & outside every sleeping area.	NFPA 72, the National Fire Alarm Code, requires <b>REPLACING SMOKE ALARMS EVERY 10 YEARS.</b>
<b>Carbon Monoxide (CO) Alarms</b>	Install in a central location outside every sleeping area and on every level of your home.	A CO ALARM MUST BE REPLACED AT THE END OF ITS SERVICE LIFE. UL Listed CO alarms will give an End-of-Life beep as a reminder to replace. <b>KIDDE CO ALARMS ARE UL LISTED AND LAST 10 YEARS. (mfg after 1/2013)</b>

## SMOKE ALARM SENSOR TECHNOLOGY

	Ionization sensing alarms may detect invisible fire particles (associated with fast flaming fires) sooner than photoelectric alarms.
	Photoelectric sensing alarms may detect visible fire particles (associated with slow smoldering fires) sooner than ionization alarms.
	For maximum protection of the various types of fires that can occur within the home, including fast flaming, slow smoldering, and polyurethane foam, it is recommended that multi criteria smoke alarms be installed. TruSense models meet the new polyurethane foam fire detection requirements, while at the same time include intelligent technology to reduce nuisance alarms from cooking.

# TRUSENSE – THE NEW UL STANDARD

# TRUSENSE

Advanced Smoke Detection Technology

## New Smoke Alarm Sensor

### A New Safety Standard

Homes today are built tighter, materials are more synthetic and homes are burning faster than when traditional smoke alarms were originally developed. For this reason, the Standard for Single and Multiple Station Smoke Alarms, UL 217, 8<sup>th</sup> Edition, will utilize new fire and nuisance tests that all manufacturers must meet in order to be compliant.

In addition to additional fire tests, UL now required additional power surge protection for AC hardwired alarms, as well as ten year timers on all certified smoke alarms.

Kidde alarms with TruSense technology meet these new standards which help recognize real fires and prevent nuisance alarms often caused by cooking. The TruSense products are the first alarms on the market to meet the new UL smoke alarm requirements.

Current ionization and photoelectric type smoke alarms **WILL NOT PASS** the new UL fire tests.

Helps Reduce Cooking Nuisance Alarms  
UL 217 8<sup>th</sup> Ed.

### Advanced Sensor Technology

- Detects More Types of Fires
- Reduces Cooking Nuisance Alarms
- Meets New Industry Standards (UL 217 8th Ed.)

**Successful passing of four fire tests will be required to continue manufacturing smoke alarms after June 2021.**

Synthetic Materials  
Smoldering Polyurethane  
Flaming Polyurethane

Cooking Nuisance

Wood & Paper

**Ten-Year  
Long Life**

## INTELLIGENT WIRE-FREE

### INTELLIGENT WIRE-FREE FEATURES

An expansion of the 10-Year Worry-Free line, these alarms can be interconnected wirelessly without the need for extensive and expensive re-wiring. If one alarm goes into alert it will signal all of your interconnected alarms to go into alert. If a fire starts upstairs, you will know immediately downstairs.

- **Quick and Easy Setup:** No Wi-Fi required, and no dip switches. An average home setup takes just minutes.
- **Voice Alerts:** Announces the type of hazard detected. Smoke alarms announce "Fire!" when a smoke or fire hazard is detected. Combination Smoke/CO alarms additionally announce "Warning Carbon Monoxide" when a CO hazard is detected.
- **Sealed-in Lithium Battery:** No battery replacement required over the 10 year life of the alarm. Eliminates worry about battery removal and maintenance fees to change batteries.
- **Photoelectric Sensor:** Smoke alarms contain advanced photoelectric sensor that may detect visible particles (associated with smoldering fires) sooner than ionization alarms.
- **Self Activation:** Automatically activates when attached to included mounting bracket.
- **Listings:** Smoke Alarms – UL 217 Listed  
Combination alarms – UL 217 and UL 2034 Listed  
California State Fire Marshal Listed

**Ten-Year  
Long Life**

## WORRY-FREE SMOKE &amp; CO ALARMS

Ten-Year  
Long LifeLONG LIFE SEALED-BATTERY ALARMS  
PROVIDE A DECADE OF PROTECTION  
FROM SMOKE, FIRE AND CO.

Powered by a sealed-in, 10-year lithium battery, Kidde's Worry-Free smoke and CO alarms use only one battery for the life of the alarm to provide 24/7 fire safety protection.

- **10-Year Alarms are Now Required in Many States and Municipalities** — Learn more at KiddeHomeSafety.com
- **Hardwired (with 10-Year Battery Backup), Battery Powered and Wireless options.**
- **All Kidde 10-Year Products are UL Listed** — PROVEN to provide a decade of protection.
- **Savings for Landlords and Contractors** — Save money over the life of each alarm on batteries and maintenance costs.
- **Ideal for Multi-Family Applications** — Apartments / condos, dorm rooms, hotels / motels, assisted living facilities.

## 120V AC/DC HARDWIRED CO ALARMS

21006407: 6 pc box

**KN-COP-IC**  
AC/DC  
Digital Display:

- Digital Display shows level of CO the alarm is sensing
- Peak level button displays the highest level of CO recorded

21006406: 6 pc box

**KN-COB-IC**  
AC/DC Basic  
Protection:

- Tamper-resist locking feature is great for landlords and property owners

21007426: 6 pc box

**AC/DC Premium**  
**CO Alarm:**

- Sleek low profile design
- Maintenance-Free
- Blue digital display with LED indicators
- Seven year product life

## CONTRACTOR FRIENDLY FEATURES

## EASY INSTALLATION

- **Pre-striped wiring harness:** Easy-off cap does not require stripper tool. Tinned strands increase conductivity and wire nut grip.
- **Front battery pull tab:** Quick activation without removing battery or alarm from ceiling.
- **Large 360° mounting base:** Mountable from any angle and covers drywall imperfections.

## FEWER CALLBACKS

- **Dust cover:** Protects sensors from contaminants during construction.
- **One button design:** Operates Hush® and alarm test.
- **Battery run down protection:** Shuts down alarm memory when AC power is not present, reducing low battery chirp.

## USER FRIENDLY

- **Front load battery door:** Makes for easy battery replacement.
- **Tamper resist locking feature:** Deters alarm and battery theft.
- **Alarm memory:** Flashes red LED indicating which unit was initiating.
- **Battery backup:** Provides protection during power failure.
- **Interconnectable:** Connect up to 24 devices (of which 18 can be initiating).

## STANDARD 120V AC/DC PLUG-IN CO ALARMS

### 120V AC/DC PLUG-IN CARBON MONOXIDE ALARMS

**KN-COP-DP2**  
**900-0263**  
**AC/DC Basic Plug-in:**

- Optional tamper-resist feature is great for landlords and property owners
- Unit will go into constant alarm mode when removed from outlet

## FIRE & CO SAFETY

### SMOKE ALARMS SAVE LIVES

According to the NFPA, a home fire occurs approximately once every 86 seconds in the US.\* Fire experts state having a working smoke alarm cuts the chances of dying in a reported fire in half. The safest way for families to protect themselves from a home fire is to make sure they have working smoke alarms that can provide an early alert and time to escape. It only takes a few minutes to install or test a smoke alarms, develop and practice an escape plan, and learn how to use a fire extinguisher.

\*Source: NFPA: Fires in the United States During 2014

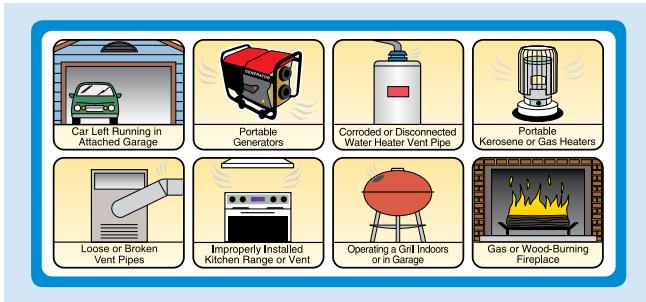

### CARBON MONOXIDE: THE SILENT KILLER

Carbon monoxide (CO) is the number one cause of accidental poisoning deaths in the U.S. The poisonous gas is often called the "silent killer" because it is odorless, colorless and tasteless.

Any time a fuel-burning appliance malfunctions or is improperly installed, CO can quickly reach dangerous levels in the home, leading to injury or even death.

Symptoms often mimic the flu without a fever, and can include dizziness, severe headache, nausea, sleepiness, fatigue, weakness and disorientation.

### POTENTIAL SOURCES OF CO POISONING

### REPLACE OUTDATED ALARMS WITH KIDDE 10-YEAR BATTERY ALARMS

**Ten-Year  
Long Life**

- **Sealed Lithium Battery:** *No missing batteries or worry of non-functioning alarm.*
- **Maintenance-Free:** *Battery never needs replacing. No more low battery chirps!*
- **Save time and money by investing in Worry-Free 10-Year Alarms!**

## About Kidde Safety

Kidde is the world's largest manufacturer of fire safety products. Our mission is to provide solutions that protect people and property from the effects of fire and its related hazards. For more than 100 years, industry leaders, the military, airlines, firefighters, businesses and millions of homeowners have turned to us to do exactly that.

Choose Kidde for fire extinguishers, smoke alarms, carbon monoxide alarms, and other life-saving devices.

For more information on all of the products Kidde offers, please visit [www.Kidde.com](http://www.Kidde.com).
