

Dear PBC STEM Community,

As another summer ends and a new school year begins it brings with it exciting opportunities and new challenges. Palm Beach County is rich with STEM resources and opportunity. As we work together to strengthen our Ecosystem, connecting, amplifying and accelerating these resources and opportunities is a primary goal of our work together to benefit young people in our community.

I am excited to announce our partnership with [Science Near Me](#) (SNM). SNM is a project funded by the National Science Foundation designed to improve public engagement with science and informal science learning. ScienceNearMe.org was created so the public can easily find a wide variety of STEM experiences. Together we can provide a directory for parents, teachers and caregivers to search for curated STEM learning opportunities nearby.

We have started populating the SNM system with local STEM events, which you can now view on our website:

<https://www.coxsciencecenter.org/pbc-stem>

If you have an event or opportunity you would like to see listed, please email the information or [use this form to submit a STEM activity](#).

Together, we can cultivate a future where every student has access to high-quality STEM education and the chance to pursue their passions. Let's ignite curiosity and innovation in our students, ensuring they are well-equipped to thrive in a rapidly evolving world.

Thank you for being a part of our STEM journey!

Mark Howard
