

DAILY 5 THURSDAY SEPTEMBER 10

Q3 Inspections = Red

NO ENERGIZED TOOLS IN BAGS

There should not be any energized tools in job bags. When placing battery operated tools in your bag, make sure the battery is removed to prevent inadvertent start up.

COVID-19 RETURNING TO WORK

If you test positive for COVID-19, at the end of your 14-day isolation you must go to the building 140 medical clinic to be screened before entering the site. The medical clinic will issue a return-to-work clearance slip that you must give to your supervisor so they know you are cleared to return to work.

HAND CHECK!

Where are your hands? Are they in a position where they could be hurt? Make sure to protect your hands by:

- Identifying all pinch points.
- Wearing the correct gloves.
- Never placing your body/hand in a pinch point or in the line of fire.
- Being cautious when placing hands or fingers in between objects.

RESPECT OTHER'S WORK

It is important to respect other's work. Be careful and respectful when working in and around installed equipment.

See page two for more information.

RIGGING INSPECTIONS

Make sure you perform thorough rigging inspections prior to use. Failed rigging during a lift could result in lives lost or severe injuries. Qualified riggers and PICs MUST inspect rigging before use. Even a brand new sling may have a cut due to incorrect transport and handling between the rigging loft and the point of use.

HOUSEKEEPING IN YOUR AREA

Take a second look at your work area before leaving to make sure everything is clean and safe.

Ask yourself these questions:

- Are walkways clear of obstructions?
- Are combustible materials removed?
- Are structural materials on cribbing?
- Is the area free of trash?
- Are proper barricades being used?
- Are there any safety or quality hazards?

WORK AREA SET UP

Set up your work area for success. If you are working at heights, make sure you follow the Dropped Objects Prevention Plan or have the proper barricades set up below as well as pearl weave to prevent dropped objects.

PBS OBSERVATION WINNERS

This week's night shift PBS observation winners are:

Unit 3

- Indalea'o Cases
- Huck Helmly
- Marcus Naylor

Unit 4

- Ricky Nolen
- Bryan Roach
- Bruce Vero

Winners can stop by building 142 or see a dedicated PBS member for their prize.

Foreman iPad features

Did you know foremen can use an iPad in the field to help with their daily responsibilities? The site iPads have access to Daily 5s, Toolbox Talks, COVID updates, and Hi-Vis. Foremen can also use the camera, notes app, and calculator.

If you are interested in using an iPad for work, contact your supervision.

CANCELLED: Shaping Behaviors for Zero Incidents

The ES&H Safety Leadership Workshop that was scheduled for day shift Friday, September 11, is cancelled. Stay tuned for more information on the next training.

RADIOGRAPHY AREAS

Watch for magenta/yellow warning tape:

- 0200-0500: NI4 Containment (Fri)
- The radiography window times on site have switched to:
- Unit 4: 1500-1800 to 0200-0500
 - Unit 3: 1600-1900 to 0300-0600

CONSTRUCTION TESTING

- Hydrolazing HDS Piping: U3 Turbine Building
- Pressure Testing CAS Piping/ Tubing: U3 Turbine Building
- Pressure Testing ASS Piping: U3 Turbine Building
- Pressure Testing FWS Piping: U3 Turbine Building

Quality Awareness

Respect other's work to maintain quality

March 25, 2020

It is important to respect other's work. Strict requirements govern how work is completed and maintained through turnover to the Initial Testing Program group and ultimately to Operations. Safety and Quality concerns arise when equipment is stood on or used as storage. These actions can cause damage, rework, and schedule delays.

When working near installed equipment you should never:

- Stand or lean on equipment
- Stack, hang, or lean items on or against equipment
- Use the cabinets for storage of material, work tools, bags, or equipment
- Hang a harness or bag from any installed equipment

Be careful and respectful when working in and around installed equipment. Do your part to complete work safely and maintain our Quality standards.

Dave Sprague

Project Quality Manager

Hardhat hanging off installed equipment.

Harness and other materials hanging from installed equipment.
