## INFORMATION

### BACKGROUND

At the Tuesday, March 19, 2019 City Council meeting, the Mayor and City Council approved Ordinance No. 30233, an ordinance amending Section 26.40.020 of Chapter 26.40 of Title 26 of the San José Municipal Code to permit San José Clean Energy to (1) decrease rates, and (2) adjust rates that are fixed against Pacific Gas and Electric Company rates, without requiring written notice to customers or a finding of extraordinary circumstances by City Council if the rate is decreased or modified more than twice a year. Council Member Khamis motioned to approve the Mayor's memo with an amendment to require an informational memo to be sent to council members when a San José Clean Energy rate change occurs comparing the new rate, the previous rate and PG&E's rate.

### ANALYSIS

PG&E filed an advice letter to the California Public Utilities Commission on February 26, 2019 effective March 1, 2019 pending final disposition with rate decreases to Medium General Commercial Demand-Metered Time of Use Service (E19T) and Agricultural Power (AG1A) Connected Load. To remain competitive and keep rates at a 1% savings on Generation compared to PG&E, the said San José Clean Energy rates have been adjusted.

Please see the below rate changes to be retroactively effective March 1, 2019.
