

Memorandum

TO: HONORABLE MAYOR AND
CITY COUNCIL

FROM: John Ristow

SUBJECT: PAVEMENT MAINTENANCE
THREE-YEAR PLAN (2020-2022)

DATE: December 23, 2019

Approved

James Mague

Date

12/23/19

INFORMATION

Each winter, the Department of Transportation (DOT) provides an update regarding expected pavement maintenance for the construction season to commence in the spring. As funding for pavement maintenance in the City of San José has stabilized, DOT is able to plan maintenance activities over the next three construction seasons (2020-2022) with more confidence.

This memorandum provides the City Council with information on planned locations and proposed pavement treatment work on City streets in 2020, and preliminary information on the overall strategy and plan for the subsequent two construction seasons (2021-2022). The three-year plan will be updated annually, with the overall goal of maintaining each of the 1490 miles of local and neighborhood streets over the next nine years, while ensuring appropriate levels of maintenance on the 944 miles of major streets.

As DOT prepares to deliver another year of significant pavement maintenance activity, it is important to highlight that all 277 miles of planned streets in the 2019 maintenance program have been completed and there will be no winter suspension of paving operations this year.

BACKGROUND

The Pavement Maintenance Program is fully funded for the 2020 construction season with approximately \$111.8 million (excluding rebudgets and carry over encumbrances from FY 2018-2019) in funding. New funding for the 2020 program includes, among other sources, \$37.5 million from Measure T, \$37.3 million in combined funding from 2016 VTA Measure B and Senate Bill 1, and a federal grant which will provide approximately \$17.2 million for maintenance on the major streets. When accounting for ongoing, temporary and one-time funding, DOT predicts an average of \$96.5 million in annual funding over the next 5 years.

With these new and consistent funding sources, and direction from the City Council, DOT has prepared a 3-year Pavement Maintenance Plan to preserve and rehabilitate 635 miles of City streets, which includes 213 miles of major streets and 420 miles of local and neighborhood

HONORABLE MAYOR AND CITY COUNCIL

Subject: 2020 Pavement Maintenance Program

Page 2

streets. The 2020 Pavement Maintenance Plan includes 203 miles, of which 75 are major streets and 128 are local and neighborhood streets. DOT has coordinated this plan with other City Departments, external stakeholders that work on City streets, City Council Offices and the Mayor's Office.

DOT estimates that \$102 million is needed each year for a ten-year period to achieve an overall pavement condition rating of "good", which is a pavement Condition Index rating of 70 or higher. DOT will provide complete analysis of the City's current and projected pavement conditions and funding levels and needs to the Transportation and Environment Committee in February 2020.

ANALYSIS

1. 2020 Maintenance Plan

The City's pavement network is separated into two categories: the Major Streets Network and the Local and Neighborhood Streets Network. The 2020 Pavement Maintenance Program includes projects on both of these networks.

Major Streets Projects

The Major Streets Network consists of 944 miles of the City's most heavily traveled streets, which collectively carry approximately 85% of traffic in the City. Six separate pavement maintenance projects are being prepared to implement the 2020 major street maintenance program, which will preventively maintain or resurface approximately 75 miles of streets and include all necessary curb ramp installations and upgrades to comply with ADA requirements.

To select the major streets identified for treatment in 2020, DOT utilized information provided by the City's Pavement Management System to generate a candidate list of streets for preventive maintenance (sealing) and rehabilitation (resurfacing). The candidate list of streets and the mix of treatments (sealing versus resurfacing) is a function of the complex analysis that the Pavement Management System performs to improve and maintain the pavement network in the most cost-effective manner with available funding. The candidate list was then thoroughly analyzed by staff using the following criteria to create the final list of streets:

- Funding availability and funding use restrictions
- Streets on the Major Streets Network
- Streets not affected by current or future street or utility related projects
- Maintenance history and prescribed treatment schedules
- Streets associated with planned safety, bikeway or other "complete streets" projects

HONORABLE MAYOR AND CITY COUNCIL

December 23, 2019

Subject: 2020 Pavement Maintenance Program

Page 3

- Community and City Council office feedback regarding roadway conditions and priority street segments
- Relative location of street segments to create multiple, continuous segments, consistency within neighborhoods, and project efficiency
- Multi-year geographic input across the City and street network

The following is a summary of the six Major Streets projects for 2020:

Curb Ramp & Concrete Projects (2) and Remove and Replace Asphalt Project (1)

The purpose of these three projects is to prepare streets for preventive maintenance sealing in 2020. DOT will concurrently implement two curb ramp and concrete projects that will install missing or retrofit existing curb ramps along streets planned for pavement maintenance to ADA standards. A remove and replace asphalt project will repair failed areas of pavement and generally prepare the streets for the subsequent preventive maintenance sealing treatment (see Street Sealing Project below). These three contracts are planned for advertisement in December and January, Council award in March, and construction starting in March and April.

Street Sealing Project (1)

This project will perform a street sealing treatment (microsurfacing) on approximately 32 miles of major streets. Microsurfacing is a treatment that applies a thin layer (3/8") of fine aggregate and asphalt emulsion to the surface of a street in fair to good condition to extend the useful life of the street and reduce future maintenance costs. The project will also install all final roadway markings and striping. The project is planned for advertisement in February, Council award in April, and construction starting in June.

Street Resurfacing Projects (2)

DOT will be performing two resurfacing projects in 2020 on approximately 43 miles of major streets. Resurfacing is a treatment in which a street in poor condition is restored to good condition by removing/replacing or reconditioning damaged pavement and applying a new 2" to 4" layer of asphalt concrete. DOT will continue to utilize the process of Cold-in-Place Recycling as a cost effective and environmentally friendly method for pavement rehabilitation wherever appropriate. The use of rubberized hot mix asphalt as the final wearing surface will also continue. The first 13-mile project is planned for advertisement in February, Council award in April, and construction starting in June. A final schedule for the second 30-mile project has not yet been established as it is a federally funded project and DOT staff is waiting for final review and approval to proceed. Construction on the second project is expected to begin in the summer.

HONORABLE MAYOR AND CITY COUNCIL

Subject: 2020 Pavement Maintenance Program

Page 4

Attachment A provides the list of roadway segments planned for the 2020 Major Streets Pavement Maintenance Program.

Local and Neighborhood Streets

The Local and Neighborhood Street Network is organized into 135 geographically contiguous “Pavement Maintenance Zones” (PMZs) to support efficient planning and delivery of projects, maximize the amount of work completed at one time within a neighborhood area, and ensure geographic spread of pavement maintenance across the City. With nearly 1,500 miles of local and neighborhood streets, DOT is utilizing the PMZ model to develop and deliver a maintenance plan for the Local and Neighborhood Streets Network.

To select PMZs that will be maintained in 2020, DOT analyzed the conditions of each PMZ and identified those with overall poorest conditions from each Council District to generate a candidate list of PMZs for the 3-year plan program. The candidate list was then prioritized using the following criteria to create the final list of PMZs for the 2020 Local Streets projects:

- Total miles of streets in reconstruction and rehabilitation category
- Maintenance history and prescribed treatment schedules
- Community and City Council office feedback regarding roadway conditions and priority street segments
- Relative location of street segments to create multiple, continuous segments, consistency within neighborhoods, and project efficiency
- Multi-year geographic input across the City and street network
- Number of public traffic attraction facilities such as schools, hospitals, libraries, community centers, etc.

Eight separate pavement maintenance projects are being prepared to implement the 2020 local streets maintenance program, which will preventively maintain or resurface approximately 128 miles of streets and include all necessary curb ramp installations and upgrades to comply with ADA requirements. The following is a summary of the eight (8) local streets projects for 2020:

2020 Local Streets ADA Ramps Projects (2) and Remove and Replace Project (1)

These contracts are planned for advertisement in January, Council award in March, and construction starting in April.

2020 Local Streets Sealing Project (1)

This project will seal approximately 54 miles of the Local and Neighborhood Streets Network in 2020. This contract is planned for advertisement in February, Council award in late April, and construction starting in June.

2020 Local Streets Resurfacing Projects (4)

These four (4) projects will resurface over 74 miles of local and neighborhood streets. A variety of resurfacing treatments such as mill and fill, Cold In-Place Recycling with overlays, and thin straight overlays with base repairs will be utilized to restore pavement surface to good condition and maximize the remaining service life. These four contracts are planned for advertisement in February, Council award in late April, and construction starting in May.

Attachment B provides the list of all 126 miles of streets within all Council Districts.

2. Three-Year Plan (2020-2022)

The list of 635 miles of streets planned for maintenance over the next three years is too extensive to include as an attachment to this memorandum and specific projects have yet to be fully scoped for the 2021 and 2022 pavement seasons. *Attachment C* provides a map of maintenance that is preliminarily expected to be performed between 2020-2022, with a greater degree of confidence associated with the locations identified for the 2020 season. This map also highlights the streets maintained in 2019. A more detailed map and additional information is provided at the DOT website located here:

<https://www.sanjoseca.gov/your-government/departments/transportation/roads/pavement>

DOT will update this three-year plan each December to help the public understand and prepare for maintenance occurring throughout the City.

3. Pilot Procurement Method

This past year, DOT staff interviewed staff from other City departments, contracting experts, and staff from other jurisdictions to explore ways of procuring longer-term maintenance contracts with the goals of increasing efficiency, reducing cost, and ensuring more consistent construction quality. DOT is planning to pilot a procurement method to meet these goals with one or more projects in 2020. If the pilot is successful, DOT plans to transition more projects to the new procurement process that will be more aligned with 3-year maintenance cycles.

4. Safety, Complete Streets, and Bikeway Improvements

DOT will continue to take advantage of the annual pavement maintenance program to install various “complete street” elements that result in safer streets with improved mobility options. Newly paved streets provide a cost-effective opportunity to reconfigure vehicle lanes, enhance existing or install new bike lanes, and upgrade vehicle and bike detection systems, where appropriate. Coordination among DOT’s programs and projects, as well as coordination with other departments, is a key component in developing and delivering the annual pavement maintenance program.

HONORABLE MAYOR AND CITY COUNCIL

December 23, 2019

Subject: 2020 Pavement Maintenance Program

Page 6

Regarding bike lanes, DOT looks to retain, enhance, or add bike lanes in a way that maximizes safety and the orderly flow of traffic for all roadway users while minimizing the impact to vehicle capacity and on-street parking. For 2020, streets with existing bike lanes will be evaluated for the installation of enhanced bike lanes. Work is also underway to identify and prepare designs for new bike lane installations where they do not exist. Some of these locations may impact lane configurations and on-street parking. In these cases, DOT will ensure that proper analysis and outreach to the council offices and the community occurs prior to approving and implementing any final complete street designs.

Of particular note and interest is that the 2020 pavement program will incorporate the third-year of “Better Bikeway” improvements along selected corridors in the Downtown and adjacent areas to further connect the San Jose bike network. Notable streets planned for the third year of Better Bikeways improvements include: Tenth Street, 11th Street, and San Antonio Street. The 2020 Pavement Program will additionally incorporate work along the following Vision Zero Corridors: Senter Road and McLaughlin Avenue.
