OFFICE OF
EXTENDED STUDIES

Shooting Scene Reconstruction Training

Over two days, you will have instruction on the various types of examinations related to the field of shooting scene re-construction.

Topics Include:

- Introduction to bullet trajectory reconstruction based on the analysis of bullet holes and cartridge case location to establish the location of a shooter
- Determine angle and direction of fire and the location or positioning of the shooter through the geometric measurement and analysis of bullet holes
- Use simulated evidence to draw conclusions
- Learn how to prepare notes and conduct visual examinations
- Write reports on observations of specimens supplied for testing

Dates:
October 2-3, 2017

Location: Indiana University of PA, main campus

Time:
8:00 a.m.-4:30 p.m.

Registration Fee: $395 per person

Register online at
www.iup.edu/learning4life
