HOW DO YOU MAKE A HOMEMADE PHONE HOLDER?

In Addition To My Method There Are A Few Other Ways You Can Construct And Personalize Your Phone Holder.

- You Can Create A Fun Phone Holder From A Toilet Paper Roll By Placing It Upwards And Cutting Two Diagonal Slits To Form An Angle.
- Take It To The Next Level By Adding Two Paper Glasses To Make A “Sound-Amplifying” Phone Holder. This Can Be Decorated With Musical Motifs To Emphasize Its Functionality.
- If You Have Leftover Nail Polish Or Eyeshadow That Has Passed Its Expiration Date, Include Them In Your Crafting Stash And Use Them To Paint Your Phone Stand.
- For The Retro Nostalgic, A Bit Of Colored Fluff Will Give Your Holder A Vintage Look. Also, A Doily Wrapping Will Make It A Great Gift For Grandma’s Phone, So That She Doesn’t Need To Hold It In Her Hand For Too Long.
- Wrap It In Colorful Cellophane To Make It Look Like Candy Or Add Glitter Or Sparkly Rhinestones For A Fashionista.

A FEW IDEAS TO PERSONALIZE YOUR DIY PHONE HOLDER:

- If Using Washi Tape, You Can Use The Same Tape To Cover Your Charger And Make It Look Like The Holder. In A Home With A Large Family, This Will Save You The Trouble Of Searching For Your Charger Or Fight Over Who Took It And Won’t Admit.
- A Paper Towel Roll Is Larger And Is Great For Tablets Or As A Holder For More Than One Phone.
- If You’re Feeling Over-Crafty, You Can Replace The Push Pins With A Beautiful Wire Stand In Any Shape You Like. Just Make Sure It Won’t Move Or Roll In The Stand And Make Your Phone Fall Down.
