

Technology, Pornography & Safety: What Every Parent Needs to Know

With all of the great technological advances in the last decades, people are facing challenges that no other generation has faced. Studies show that our young people between the ages of 8-18 spend 11.5 hours each day using various devices, and that the average age of first exposure to pornography is 9.

Thursday, January 26, 2017, 7 PM to 8:30 PM
