Unplug with KZ's Industry-Leading Boondocker Solar System

SHIPSHEWANA, INDIANA – KZ Recreational Vehicles has recently unveiled their new industry-leading solar package, available for the luxury and toy hauler lines Durango, Durango Gold, Venom, and Venom V-Series. The eight-panel package sets a new standard for boondocking in luxury.

The solar package includes eight 220W solar panels, equaling 1,760 watts of solar power, a 5,000-watt Victron inverter/charger 24V that is capable of powering everything in your fifth wheel, one 15,000 BTU A/C with Soft Start, a 100-amp Victron MPPT Solar Charge Controller, and two 200AH 24V Lithium Batteries that are equal to eight 100AH 12V Lithium Batteries. The package includes a 25-year warranty on the solar panels, a 10-year warranty on the lithium batteries, and a 5-year warranty on all Victron Energy components.

The system powers all outlets and appliances and can run one 15,000 BTU A/C for 10 hours through the night, keeping you nice and cool. It is equally sized for optimum performance and can recharge batteries quickly in just six to eight hours of full sun exposure. In addition to this, the generator/shore power can also recharge batteries in eight hours. To enhance usability, it is easy to monitor the system through the RV's touchscreen or through the system's app.

Brent Froman, General Manager at KZ RV, stated "KZ's industry-leading solar package is in a league of its own, for the first-time allowing travelers to reach even more remote locations without sacrificing the comforts of home."
