Wilo-Rexa SUPRA

Submersible Sewage Pump

Submersible Sewage Pump

Wilo-Rexa SUPRA

Applications

- Untreated sewage
- Pre-treated sewage
- Process water
- Wastewater

Head Range: 6 feet – 174 feet

Flow Range: 0 gpm – 2,695 gpm

Features & Benefits

- Wet pit and dry well installation
- High operational reliability due to hydraulic design non-susceptible to clogging
- Easy integration into system control and monitoring of the pump with the optional Wilo-DDI
- Long service life in abrasive and corrosive fluids thanks to different Ceram coatings
- Customer-specific solutions thanks to comprehensive configuration options

Technical Data

- Single-channel impeller
- Up to 80% hydraulic efficiency
- Grey cast iron pump housing and impeller
- Optional Ceram Coatings: C0, C1, C2/C3
- Asynchronous-submersible motor drive system
- Operating Mode: S1 non-immersed or immersed, depending on motor type
- Optional Ex protection
