Congratulations and Heartfelt Thanks!

Congratulations to Dr. Christy Kesslering, Medical Director of Radiation Oncology for Northwestern Medicine Radiation Oncology at Central DuPage and Delnor Hospitals, and RadComp Principal Investigator at Northwestern.

Dr Kesslering will be leaving her current practice to begin a new venture in the Health and Wellness industry to help patients improve their metabolic health to augment cancer treatments and reverse chronic disease beginning in the New Year.

Dr. Kesslering has been a major contributor to the RadComp Study since its beginning in 2016. Located in the Chicago area, she has been the second highest enrolling physician every year of the study. Under her leadership, she and her team have enrolled ninety participants to the RadComp Study.

Dr. Kesslering will be handing over the reins of the RadComp Study to Dr. Arpi Thukral after a two-month transition period.

We at the RadComp Coordinating Center are grateful for her service and dedication. Please join us in wishing Dr. Kesslering a happy and productive retirement!

Congratulate Dr. Kesslering
