2024 Scholars Greeting

Greetings to our wonderful Sponsors
from your University Scholars, their Families, Teachers, Volunteers
and Sustainable Cambodia Family.

Graduation Day of our Scholar Sreyneang!

The greatest thing of our university scholars' learning life is to graduate with their degree, wearing the honored graduation uniform with a very nice graduation hat, receiving the certificate of their great accomplishment and afford of their fourth-year studies, *cheering* from family and friends with the sweet smiling faces to congratulate them on their special day.

Your wonderful scholarship support is the big part of their success. Thank you for being a part of their journey.

Your valuable contributions to their educations bring light to life.

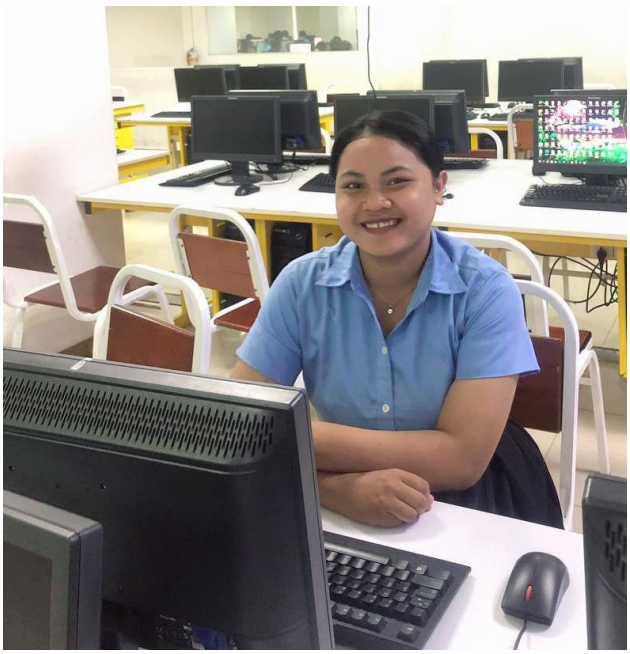

Our Scholarship Program Story

Growing from grade school to university, our graduating scholar Sreyneang represents **414 Scholars** over **20 Generations** of SC students who have taken brave steps to pursue their dreams and advance their studies to become new voices of Cambodia.

Planting the Seeds ~ Years ago, an international volunteer named Laura asked her study group about their dreams. If they dreamed of attending university, what steps could they take to be ready? What would they love to study? What courses and degrees are available? What could they do as 10th graders to be prepared to pass the 12th grade government exam and to enter university? And …what could SC do to help them follow their dreams? The seeds were planted. Our Scholarship Program had begun.

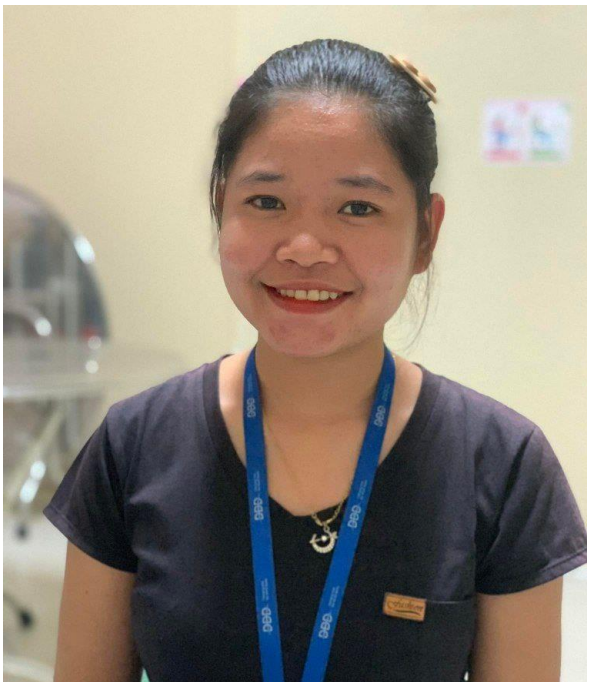

We are thrilled to share these exciting updates on your university scholars and hope you will enjoy!

- Here is one exciting thing during her **first-year** study at university described our scholar Yi, majoring in **Information Technology** at Asia Europe University!

Hello! My name is Yi. I would like to describe one thing that is really exciting for me in this semester. I was selected to be a **team leader** of our group assignment. I was so excited but a little bit of nervous. Thankfully, I experienced doing presentations in the class when I was at Sustainable Cambodia school so I feel more confident in taking this role. The good thing is my team members are great. They were very cooperative. We helped each other and listened to each other's opinions. The outcome of our team work was incredible. This motivated us to do more.

- Here is the great improvement of one of our university scholars, **Naratt**, a **second-year** student majoring in **Khmer Literature**.

Hello! My name is Naratt. I would like to share about my growth that I have noticed in this second year of study as a university student: I feel very motivated to study more than last semester. I always go to the library, read books and research lessons, and I am more eager to do the presentations. Especially I feel fresher and happier when I sit down to study in my school campus. Since entering the second year, I feel more and more in love with my studies. When I sit down to study, I always feel excited and happy. I really do not know how to describe my feelings to make you understand. But the feeling of happy does make me do well with my studies.

❖ Here is an inspiring message describing a person who has changed the way one of our scholar thinks. **Sotheanun** is a **third-year** university student majoring in **Civil Engineering**.

Hello, My name is Sotheanun. A person who has changed the way I think is my mother. I live with my single mother. She is an educator. She raised me well. She worked hard to support the family. Once she said to me that "Son, you are my hope and I believed in you. Please remember that nothing happened without effort. If you try hard it will pay off." As we know, life at university is challenging but every time I feel of giving up, my mother's advice pops up in my mind and her smiling face keeps motivated me to do more. She is my role model and my special strong mother.

❖ Here is exciting news from one of our **fourth-year** students **Keanti** who is majoring in **Chemistry**.

Hello, My name is Keanti. I am very grateful that I had a chance to go to university under the support of Sustainable Cambodia and especial my sponsor. I am very excited that I am going to finish my degree soon. Can't wait for the graduation day. I would love to share how my university study has helped me. I have achieved my dream goal now of being a Chemistry teacher. Currently, I am a Chemistry teacher at two well know international private schools in Phnom Penh. You may not gonna believe that I teach Chemistry using English language to my 8th and 9th graders and **I CAN**. It's such a great experience I am having.

With the support of my sponsor, my dream comes true! There is no word to describe how thankful I am. Your support has changed my life completely. THANK YOU for helping me!

How our scholars help in guiding the next generation!

Recently, Sustainable Cambodia led the University Study Tour for the grade 12 students. This tour provides students with the opportunity to visit universities in both Pursat town and Phnom Penh city to learn about available majors and courses. By doing so, students can make informed decisions about which university and major will best suit their needs.

It's a great opportunity for our university scholars to help in guiding the grade 12 student about how life is at university. They did very good presentations. Everyone was so impressed by the speech of our scholars, Vicheka, year four student in International Relations, Sotheanun, year three student in Civil Engineering, Keanti, year four student in Chemistry and Samnang, year four student in Information Technology (Networking).

They shared useful tips to the students to get ready for college, their life stories at university and life in the city. Their stories were so inspiring along with very good questions from our students. They addressed that "They became who they are today because of Sustainable Cambodia." We are so proud and congratulate them on their great success. They are the real examples for many students.

Here is the Highlight of some Great Graduation Pictures of our successful scholars!

Our special thanks to our wonderful SPONSORS for making such a big difference in the students' lives.
