howmuch.net

The International Energy Agency estimates that it would only require spending an additional **2%** of annual global GDP (the equivalent of \$1.7 trillion annually) to achieve a net-zero carbon economy! ²

How does a rain garden work?

The US EPA estimates that pollutants carried by rainwater runoff account for **70%** of all water pollution. Rain gardens can remove up to **90%** of nutrients and chemicals as well as up to **80%** of sediments from rainwater runoff! ³

Together we can make a difference.
