Metro Route 75 Construction Reroute

NE 130th St & NE 125th St Mobility and Safety Project

During construction of the roundabout at Roosevelt Way NE and 10th Ave NE, Route 75 is operating on an alternate route to avoid active construction. We explored ways to maintain Route 75 stops near Billings Middle School but determined that this temporary route avoids safety and visibility concerns on neighborhood streets and provides a single reroute for the duration of construction. While we understand the bus stop closures create longer walking distances for people, having a single reroute for the entirety of construction provides more consistency for riders than multiple route changes over the next year of construction.

To ensure students can get to and from school safely, we have identified the below walking and biking routes for students using Route 75 or commuting directly from the Northgate Light Rail Station.

Metro Route 75

This walking and biking route serves students and families taking Route 75 and getting off at 15th Ave NE. The route is approximately ½ mile and has sidewalks and protected crossings for the entire trip.

Northgate Light Rail Station

This walking and biking route serves students coming from the Northgate light rail station. The route is approximately 1.5 miles and has sidewalks and protected crossings for the entire trip.
