

Talking Points

## **Hearing to Block LA RICS/First Net Tower Nov. 24th. 9:30 AM**

Two LA RICS/First Net Towers, for military experimentation, commercial and some emergency use (this helps to get citizen/representative cooperation and tax funds), are scheduled to go up in Topanga and Malibu.

[Click here to watch on older video](#) on LA RICS/First Net, the local and federal agencies wanting to install the tower.

### **[Here is a link to the Agenda](#)**

To call in to comment and/or listen to the hearing...

Public Hearing Agenda Item Nos. 1 through 7 call **(844) 767-5651** and enter Participant Code: **1003836** starting at 9:30 a.m.

The public will have 60 seconds to comment. Please pick one or more areas from the below to speak about at the hearing, or just speak create your own speech or speak from the heart.

This item may not come up til 10 AM or so but we don't know so please be there @ 9:30 and allow for time that morning to be spent on the call. Thank you!

### **FOR RESIDENTS NEAR SADDLE PEAK/TUNA WHERE THE TOWER WILL BE INSTALLED OR ANYWHERE ELSE IN TOPANGA...**

I am a resident in the Saddle Peak/Tuna area (or name your area) and my property value will be adversely effected if this LA RICS tower goes in. [Studies show an average of 2-20% property value decline when a cell tower is situated nearby.](#) In this case it would be not just any cell tower, but a cell tower that will be doing military experimentation along with 5G, IoT and commercial use and yes, some frequencies will be allocated to emergency services, but the fire fighters union has already spoken with you on this 5 years ago and said they have no problem communicating and they did not want these First Net/LA RICS towers at their fire stations because they were made sick from the radiation the antennas put out and

had [the studies to prove it](#). You honored their request and stopped the towers. Nothing has changed since then in terms of the harm from the radiation. In fact if anything it has gotten worse with the deployment of 5G, the millimeter wave radiation.

5G is also known to not be able to travel far if things like trees are blocking it. We wish to preserve our wilderness here in Topanga, not cut it down. If a 5G tower was to go up, there will undoubtedly be calls to cut trees down in order to efficiently carry the signal.

### **Property Value Decline**

[Property value is known to decline anywhere from 2-20% when a cell towers goes in](#). We agree the cell tower creates revenue for the county. But, if we take into account the decline in property taxes from the installation of this new super high powered cell tower, it would not only offset the incoming revenue stream from the tower but it would further erode what the county brings in, in property taxes for this area. Most of the homes in the area are multi million dollar homes. So if the median price of a home is say 1.5 million (it is probably much higher but we can go with this lower number for this example) so property taxes are approx. \$20,000 a year per home and we average 2-20% property devaluation to 9%, then subtract that from the \$20,000 in property taxes we get \$1800 x however many homes in the area near the tower and we get a very big number, a very steep drop off in revenue collected in taxes and suddenly the income the tower generates for the county is not so lucrative anymore.

### **Heath Effects**

I have ————— and I am very worried any potential military experimentation with frequencies, power densities or pulse modulations could exacerbate my condition. Studies show wireless radiation as emitted from cell towers exacerbates pre-existing conditions and creates cancer. The radiation emitted from this tower could make my particular condition of \_\_\_\_\_ much worse and possibly even be fatal.

There is now [SO much evidence](#) that wireless radiation causes cancer, neurological illness, organ damage, genetic damage and lesser effects such as headache, loss of energy. Our community is currently working to cut down and eventually STOP all this wireless radiation, not add more to it. Topanga is a sanctuary. Now, because of the cell towers already in place on Saddle Peak, whole swaths of Topanga are uninhabitable due to the radiation they emit.

We already paid the industry to lay fiber optics and hard wire everything. [The wireless industry just lost a major lawsuit over pocketing billions in tax payer money](#) that had been promised to be used for hard wired fiber optic but was instead used for cell towers and wireless because it was cheaper than hard wired despite their knowledge of health effects from wireless radiation. First Net is another land grab and robbery of our tax payer dollars under the guise of “emergency services” when in fact the majority of the tower will be used for military experimentation, commercial use and 5G and IoT.

## **Military Experimentation**

It is completely legal in the US for the military to conduct experimentation on the population. Directed energy weaponry, frequencies, power densities can be particularly damaging resulting in long term or permanent health effects and/or death. I do not want the county to place me in harms way of these experiments which [the military has fully admitted they will be conducting with the use of these towers.](#)

## **BOS Rejected LA RICS Towers 5 Years Ago Based n Cancer and Health Effects. The science proving this has gotten more robust since then, not less.**

Since the BOS rejected these LA RICS towers for all of LA County 5 years ago based on cancer and other adverse health effects, has the science changed and shown there are no longer any adverse health effects from these radiation emissions? No, the science has gotten stronger in the opposite direction with the culmination of the National Toxicology Programs

10 year, \$30,000,000 study showing [clear evidence of statistically significant carcinogenic effects](#) from background wireless radiation. My family is prone to cancer (or whatever the illness is) I don't want to further risk my families health and safety just to accommodate commercial 5G IoT and military experimentation. The fire fighters union have spoken on the issue of communications and stated on the record they have zero problems in that area. This is just another land grab at citizen tax pater expense.

## **FCC currently being sued for corruption and not properly protecting human and environmental health with regards to radiation emitted from cell towers**

[The FCC is currently being sued by multiple groups, with some of the plaintiffs of the suit are located right here in Topanga.](#) They are being sued because they fraudulently past standards for safety that fail to incorporate “non thermal” but deadly aspects of the radiation such as pulse modulation, frequency and low power density, all of which the military uses in their experimentation.

Please reject the LA RICS First Net tower as you did 5 years ago. That rejection had zero adverse effects on our emergency workers ability to communicate and you will both save the heath and lives of people near the tower, maintain your current revenue stream of taxes on the property value and not further deteriorate the already [declining population of insects, birds, foliage and wildlife that this radiation is known to destroy.](#)
