Key Messages for Tropical Storm Milton
Advisory 4: 4:00 AM CDT Sun Oct 06, 2024

1. Milton is forecast to quickly intensify while it moves eastward to northeastward across the Gulf of Mexico and be at or near major hurricane strength when it reaches the west coast of the Florida Peninsula mid week. Hurricane Watches could be issued as early as late today for portions of Florida.

2. There is an increasing risk of life-threatening storm surge and wind impacts for portions of the west coast of the Florida Peninsula beginning late Tuesday or Wednesday. Residents in these areas should ensure they have their hurricane plan in place, follow any advice given by local officials, and check back for updates to the forecast.

3. Areas of heavy rainfall will impact portions of Florida Sunday and Monday well ahead of Milton, with heavy rainfall more directly related to the system expected later on Tuesday through Wednesday night. This rainfall brings the risk of flash, urban, and areal flooding, along with minor to moderate river flooding.

Cape Coral FLORIDA	**CAPE CORAL EMERGENCY MANAGEMENT** **EMERGENCY OPERATIONS CENTER** **FLASH REPORT #03**	**DISTRIBUTION STATEMENT** **APPROVED FOR PUBLIC RELEASE** **DISTRIBUTION IS UNLIMITED**
INCIDENT NAME: **TROPICAL STORM MILTON**	DATE: **10/6/2024**	TIME: **0700**
EOC ACTIVATION LEVEL: **LEVEL III – EM MONITORING**	LOCAL STATE OF EMERGENCY: **NO**	PREPARED BY: **ALVIN HENDERSON JR. - EMDM**

Cape Coral EOC Operational Rhythm:
0700: NWS Tampa Briefing
0800: Cape Coral Unified Command Meeting
1100: Cape Coral Department Directors Briefing
1115: State FDEM County Coordination Call
1300: NWS Tampa Briefing
1715: State FDEM County Coordination Call
1900: NWS Tampa Briefing

Observational Perspective: Latest infrared satellite imagery continues to show a well-defined circulation. Also depicted was an area of organized convection around the center, signaling a healthy environment for further development. Estimated maximum sustained winds at 45 knots.

Intensity Forecast: Very warm ocean temperatures remain in place throughout the Gulf of Mexico along with an abundance of moisture with the system expected to remain well south of the stronger vertical wind shear. Within the pocket of lower vertical wind shear across the southern Gulf of Mexico, rapid intensification is forecast with the system likely becoming a upper-end Category 2 or lower-end Category 3 hurricane briefly on Tuesday before landfall on Wednesday. Long term, Milton is likely to remain at least at tropical storm, if not a minimal hurricane, intensity into the western Atlantic later next week.

Track Forecast: There is high confidence in the forecast track towards Florida. The system will continue on an easterly path through Monday. High pressure will build across Texas on Monday as a trough develops across the eastern US in the mid-levels of the atmosphere, which will steer Milton on a more ENE path from late Monday night into Tuesday with landfall expected in SW Florida Wednesday afternoon/evening.

NWS-TAMPA DETAILED FORECAST:

Today: Scattered showers and thunderstorms, then showers and possibly a thunderstorm after 11am. High near 82. East wind 7 to 10 mph. Chance of precipitation is 90%. New rainfall amounts between a quarter and half of an inch possible.

Tonight: Showers and possibly a thunderstorm before 11pm, then scattered showers and thunderstorms after 11pm. Low around 73. East wind 8 to 10 mph. Chance of precipitation is 80%. New rainfall amounts between a quarter and half of an inch possible.

Monday: Showers likely and possibly a thunderstorm. Mostly cloudy, with a high near 81. East northeast wind 9 to 11 mph. Chance of precipitation is 70%. New rainfall amounts between a half and three quarters of an inch possible.

Monday Night: Scattered showers and thunderstorms. Mostly cloudy, with a low around 74. East northeast wind 6 to 10 mph. Chance of precipitation is 50%.

Tuesday: Scattered showers and thunderstorms, then showers likely and possibly a thunderstorm after 2pm. Mostly cloudy, with a high near 84. East northeast wind 7 to 9 mph, with gusts as high as 18 mph. Chance of precipitation is 60%.

Tuesday Night: Showers likely and possibly a thunderstorm. Mostly cloudy, with a low around 75. East wind around 10 mph, with gusts as high as 22 mph. Chance of precipitation is 70%.

Wednesday: Showers and possibly a thunderstorm. High near 84. Windy, with a south wind 24 to 28 mph, with gusts as high as 55 mph. Chance of precipitation is 80%.

Wednesday Night: Showers likely and possibly a thunderstorm before 8pm, then scattered showers and thunderstorms after 8pm. Mostly cloudy, with a low around 76. Windy, with a west wind 20 to 25 mph, with gusts as high as 40 mph. Chance of precipitation is 60%.

Thursday: Scattered showers and thunderstorms, mainly before 2pm. Partly sunny, with a high near 83. Windy, with a west northwest wind 18 to 21 mph, with gusts as high as 36 mph. Chance of precipitation is 30%.

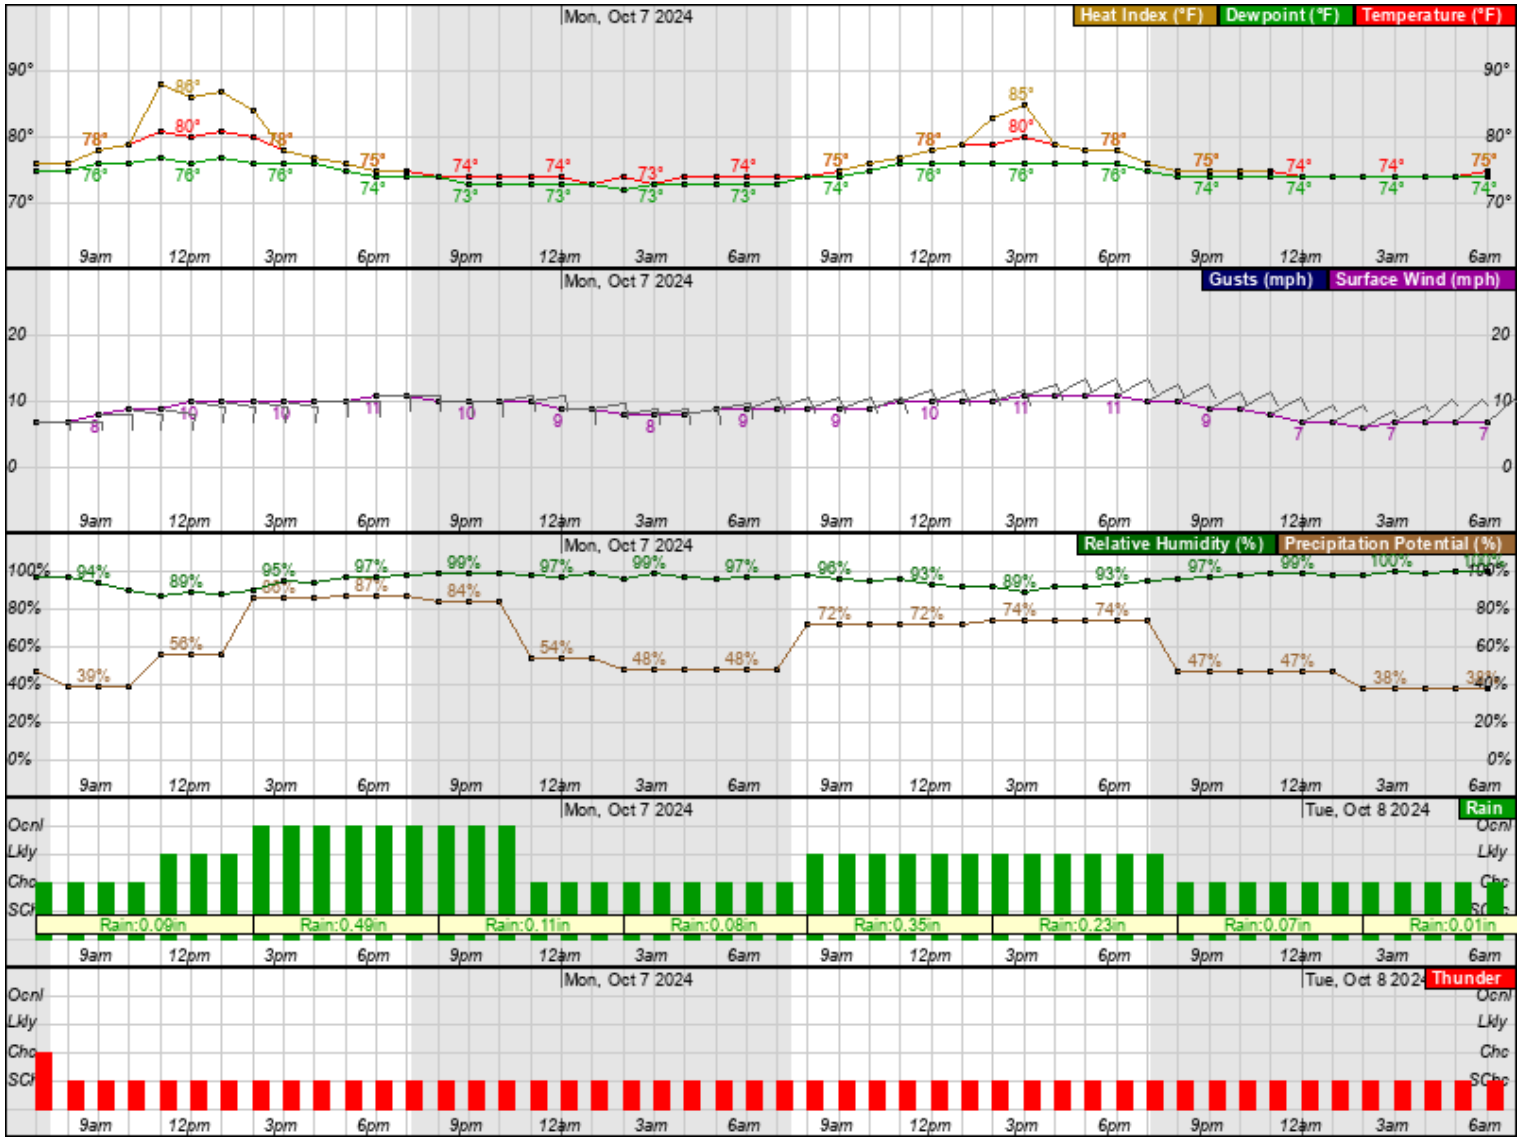

Thursday Night: Isolated showers and thunderstorms before 2am. Partly cloudy, with a low around 70. Breezy. Chance of precipitation is 20%.

Friday: Mostly sunny, with a high near 84. Breezy.

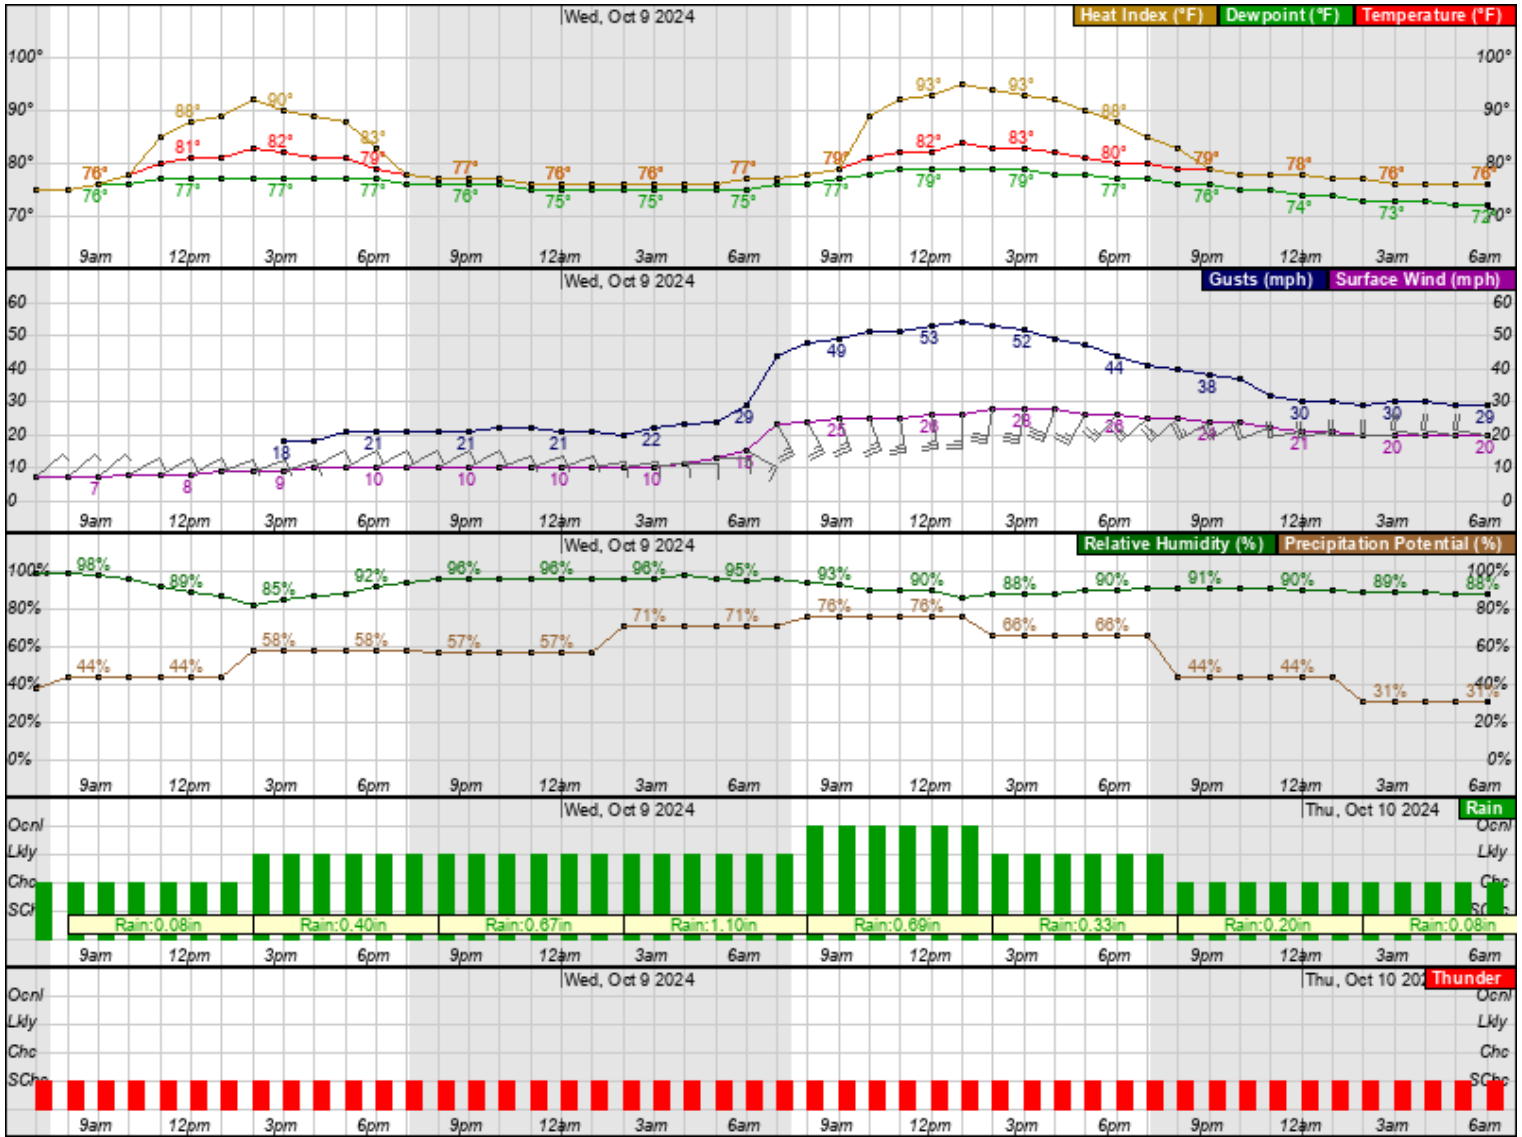

Friday Night: Partly cloudy, with a low around 71.

Saturday: Sunny, with a high near 85.
