

"Conexon knows how the auction works, which meant we didn't have to learn all of the aspects. All the legal and advisory services were part of the process with Conexon. It was nice not having to worry about the mechanics of the auction, Jonathan Chambers and the team knew how it works, so there was no learning curve. Had we done it by ourselves, I'm not sure we could have gotten our paperwork ready and participated, given our late start."

"As a result of having a feasibility study both pre-auction and post-auction, it was made clear to us that the win will allow us to cash flow in year one. We will not be subsidizing from the electric side."

**—Tim Smith, General Manager
East Central Electric Cooperative
CAF II Award -- \$22.2 M**

"United Fiber won a significant amount in the CAF II auction. This was made possible by hard work, strategy and choosing the right partners. United would not have been successful without the help of the Rural Electric Consortium and Conexon. Working together provided United with the expertise to successfully navigate the auction and win over \$20 million. This money will change lives in northwest Missouri!"

**—Jim Bagley, CEO/General Manager
United Electric Cooperative
CAF II Award -- \$20.1 M**

"Without the help of Conexon and its experienced staff, PGEC Enterprises, LLC would not have had the opportunity to provide highspeed FTTH internet access to the members of our, currently non served, communities. Conexon was able to walk us through the application process and manage all the milestones for our cooperative. It took close to 20 years to full deploy electricity to our communities nearly 80 years ago. However, with the 15.4M of CAFF funding we have received, we will be able to provide FTTH services to these same locations in only a few years."
