

ENC500 is a complete enclosure solution for JetAir high-speed centrifugal blowers. ENC500 integrates blower, variable frequency drive, inlet air filtration, and operator controls into a free-standing enclosure placed next to production lines. 304SS construction and a rugged welded frame provide environmental protection and mild sound attenuation. ENC500 features a compact design that takes up a minimal amount of line space and is easily installed.

## ENC500

## Specifications

- Specifically designed for JetAir centrifugal blowers
- Smallest footprint available
- VFD, E-Stop, & On/Off Selector
- 304 SS Construction and Welded frame
- Outboard filter element for easy maintenance
- Lift-off panel for easy blower and VFD access
- Optional: Sound Attenuation Kit - 81 dBA
