

Company	Company Description	Website
Dexory	Dexory uses artificial intelligence and robotics to transform logistics by using autonomous technology to unlock data and drive insights through all levels of business operations.	https://www.dexory.com/
AttoCore	AttoCore develops ultra-mobile core network software technology that can be deployed in consumer, professional, government and enterprise scenarios. Deployment can be as a standalone network, or interconnected with existing network services to extend wireless services anywhere in the world.	https://www.attocore.com/
Wyld Networks	Wyld Networks provides sensor-to-satellite IoT connectivity solutions and cutting-edge technology that empowers businesses across diverse industries to harness the full potential of IoT data.	https://wyldnetworks.com/
Wyld Networks		
Rovco	Rovco uses advanced AI, automation and machine learning to help speed up the development, deployment and maintenance of offshore wind farms, while also assisting the clean-up and decommissioning of older infrastructure.	https://www.rovco.com/
Invisu	Manufacturing Equipment Digital Twin Software to manage, monitor, and maintain complex equipment through one user orientated software system. Designed for manufacturing, engineering, chemical and logistical companies.	https://invisu.uk/
Invisu		
Altered Carbon	Altered Carbon's technology consists of highly sensitive digital receptors grouped together as sensor array on a microchip. It's capable of detecting millions of different gases and VOC combinations.	https://altered-carbon.com/
Altered Carbon		
Inventor-e	Inventor-e is a global leader in cutting-edge point-of-use inventory management and asset tracking solutions with a core purpose to provide disruptive solutions that improve inventory management to increase productivity and improve profitability.	www.inventor-e.co.uk

Singular Intelligence	Singular Intelligence has a focus on building software solutions driven by Artificial Intelligence & Data that enable efficiencies at scale and sustainable growth in Industries that are core to the fundamental needs of human society.	https://www.singularintelligence.com/home
iPurvey	iPurvey streamlines air or rail travel and freight disruptions through an AI-driven solution, ensuring traveler well-being, sustainability, and reliability for both travelers and businesses.	https://ipurvey.com/
PodTech	PODTECH provides tailored software development services in UK for bespoke solutions driving innovation, growth, and business transformation.	https://podtech.com/
