Thinking STEM: Algebra in Everyday Life

[Get the Math](#) is a multimedia online platform designed to help students understand how algebra applies to their lives. Students can watch videos of professionals in the sports, fashion, videogame, restaurant and special effects industries explain how they use math daily in their careers.

After watching a video, students use interactive tools to work on real-world algebra problems related to a specific career. Additionally, the [Get the Math](#) website provides teachers with lesson plans and classroom materials aligned with the Common Core Standards so they can utilize the website's videos and interactive tools in the classroom.
