

Safe, Healthy & Sustainable Environments

Specializing in active fire protection and communication systems and testing, inspection and maintenance services, Johnson Controls offers an industry-leading portfolio of fire alarm, sprinkler and suppression systems.

Combining technology, data insights, technical expertise and training, Johnson Controls helps to ensure your hotel operates at the highest efficiency, is code compliant and guests are safe.

The wide range of solutions include detection and suppression, monitoring, testing, inspection, reporting, environment protection, and mass alerts. From portable fire extinguishers and fire sprinklers to emergency and exit lighting, Johnson Controls helps keep your operation safe.
