

High School Shuttle Stops for Specific Housing Areas

After identifying additional employees with valid bus driver credentials, Guilford County Schools will offer a limited number of shuttles for high school students affected by yesterday's announcement. The shuttles will only serve apartment complexes and neighborhoods where GCS data indicates there are large numbers of students who ride district school buses and may lack transportation to school as a result.

The shuttles will be driven by school staff who hold all required qualifications to drive a school bus and who have volunteered to help.

Shuttles are not for the community. They are designed to meet the needs of the specific housing developments listed below and cannot exceed capacity or make additional runs to pick up more students.

Students will scan their One Cards (student identification badges) as usual when they get on the shuttle bus. Students at affected schools (link to list) may also ride city buses for free using their One Cards.
