

While in secondary school, Daniel was top of his class and is heading to study civil engineering during these next 2 years. His area of interest is buildings. While home for breaks he cares for his siblings, works in the family garden and is often found helping Madrine with her daughter, Brie. He sadly lost his older brother to a work-related accident, his younger sister to malaria, and one of his brothers suffer from severe burns due to an accident when he was a baby. Daniel is always looking out for his siblings and making sure their needs are met. His mother is a single mother and struggles to cover the school requirements for Daniel. RBG will cover his school fees, and she is committed to support his additional expenses through his next 2 years of study. She has created a piggery to help with these expenses.
