

NEW DEA REQUIREMENT: SUBSTANCE USE DISORDER & ADDICTION EDUCATION

On December 29, 2022, the Consolidated Appropriations Act of 2023 enacted a new one-time requirement which goes into effect as of **June 27, 2023** for any Drug Enforcement Administration (DEA)-registered practitioner (except for veterinarians) to complete **eight hours of training** “on the treatment and management of patients with opioid or other substance use disorders.”

Many U.S. states already require physicians and other medical professionals to complete CME hours on safer prescribing of opioids. This new requirement asks physicians to have additional education on the treatment and management of patients with opioid or other substance use disorders.

If you have not met this specific eight-hour training requirement yet, the deadline to do so is the date of a practitioner’s next scheduled DEA registration submission.

The requirement goes into effect on June 27, 2023, so:

- **IF your DEA renewal date is between now and June 26, 2023:** you will not need to complete the training until you renew your license the next time
- **IF your DEA renewal date is after June 27, 2023, or later:** you will need to complete the training requirement before your next renewal
