Congratulations to La Paz Intermediate math teacher Lisa Brooks for being selected to present her implementation of the Modern Classroom Project teaching model at the 2022 CMC South conference in Palm Springs.

Before the session started, the teacher pictured with Lisa said, *"I told my principal, 'I feel like I'm going to meet the Beatles.' I'm obsessed with MCP and I'm meeting an expert."* She presented to 30 teachers! Lisa did a phenomenal job! Very transparent, realistic and motivating with her presentation of MCP. Well done!

rediscovering the JOY of exploring mathematics

MODERN CLASSROOM PROJECT: HOW TO MEET EVERY STUDENT'S NEEDS

Lisa Brooks, Saddleback Valley Unified School District

Learn how the Modern Classroom Project (MCP) transformed my traditional, direct instruction, math program to a self paced, mastery based program that leverages technology to foster human connection, authentic learning and social-emotional growth.
